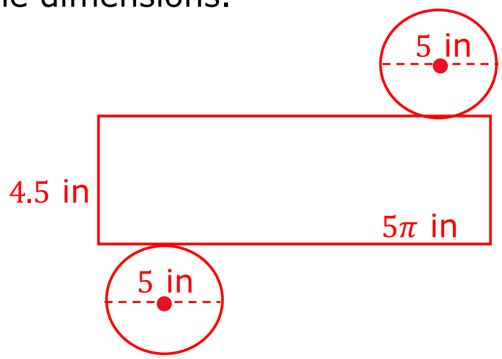
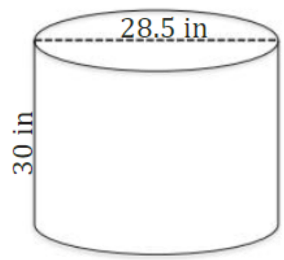
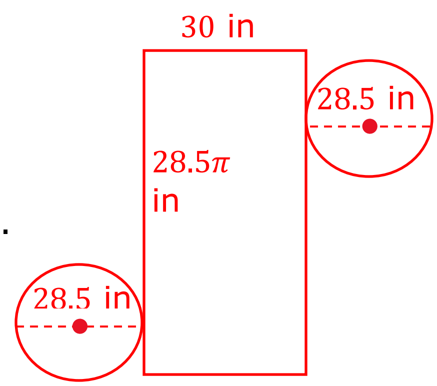
Grade 7　　　　　　　　　Name_Answer Key_________
Unit 12　　　　　　　　　 Date______________________
Lesson 1 Practice　　　　 Period_____________________

1. The tin can has a diameter of 5 inches (in.) and a height of 4.5 in. Draw the net of the tin can including the dimensions.



Use the right circular cylinder below for questions 2 – 6. Represent your answers as an approximation by using 3.14 for π.





2. Draw a net for the right cylinder including the dimensions.

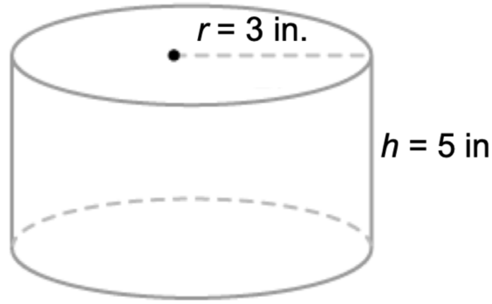
3. What is the area of one of the circular bases? Include units.
$A = \pi(14.25)^2 \approx 637.94$ in²

4. What is the circumference of one of the circular bases? Include units.
$C = \pi(28.5) \approx 89.54$ in

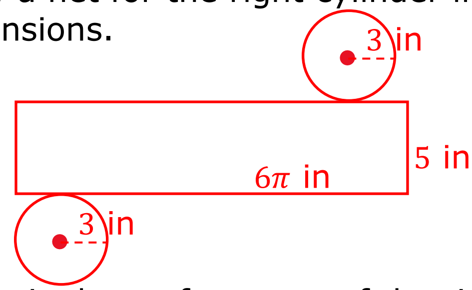
5. What is the area of the rectangle? Include units.
$A = (30\ in)(89.54\ in) = 2{,}686.2$ in²

6. What is the surface area of the right cylinder?
$SA = 2(637.94) + 2{,}686.2 \approx 3{,}962.08$ in²

Complete the following for the given context. Represent your answers as an approximation by using $\frac{22}{7}$ for π.



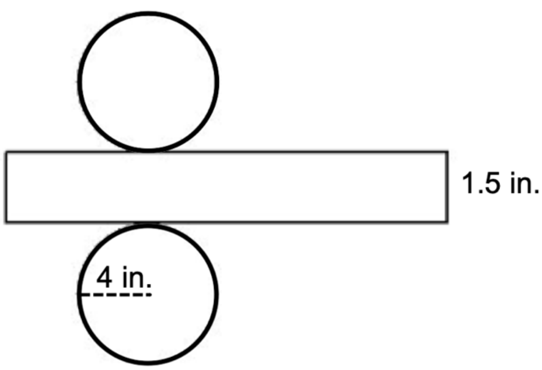
7. Draw a net for the right cylinder including the dimensions.



8. What is the surface area of the right cylinder?

$SA = 2(\pi)(3^2) + \pi(6)(5) \approx 150.86$ in²

The net of a right circular cylinder is shown for question 9 – 10.



9. The length of the rectangle is equal to the

- ○ radius
- ○ diameter
- ○ area
- ○ circumference

of the circle.

10. Find the surface area of the right circular cylinder. Use 3.14 for π and include units.

$SA = 2(3.14)(4^2) + (3.14)(8)(1.5) \approx 138.16$ in²
