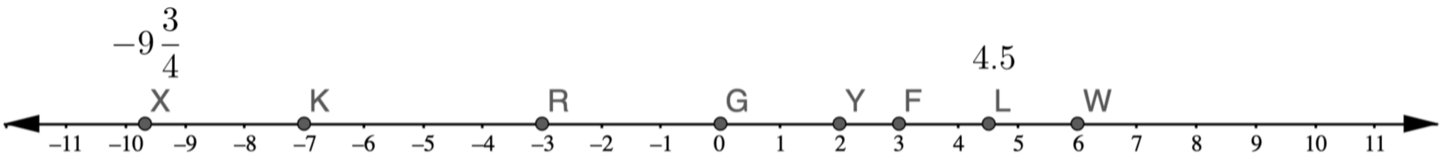
Grade 6 Accelerated
Unit 3
Lesson 1 Practice

Name <u>Answer Key</u>
Date ____________________
Period ____________________

A number line with points X, K, R, G, Y, F, L, and W is shown.



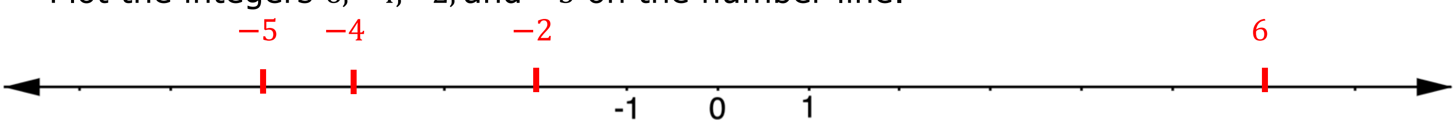
1. Complete the table by identifying which points belong in each category. Some points may be used more than once and some may not be used at all.

Natural Numbers	Whole Numbers	Integers	Rational Numbers
Y F W	G F Y W	K Y R F G W	X Y K F R L G W

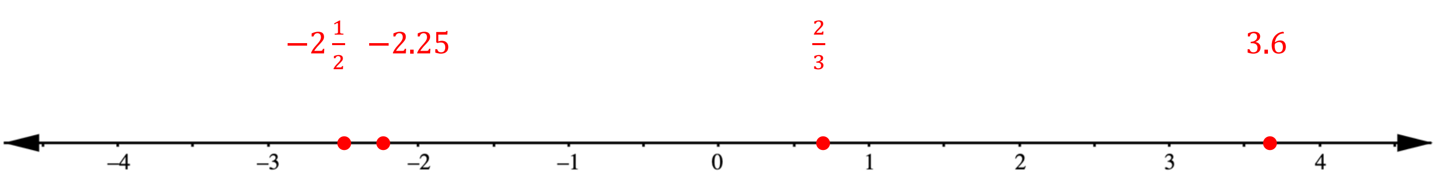
2. Complete the table by identifying which points belong in each category. Some points may be used more than once and some may not be used at all.

Positive Numbers	Negative Numbers
Y F L W	R K X

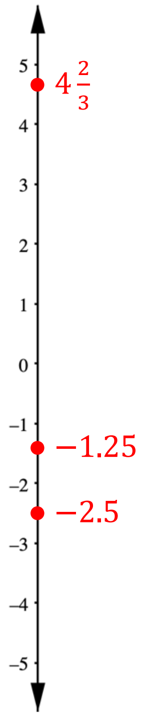
3. Plot the integers $6, -4, -2,$ and -5 on the number line.



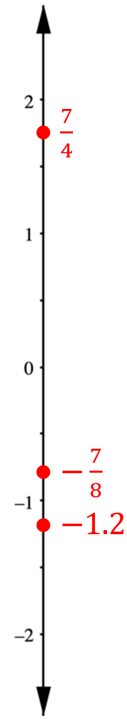
4. Plot the numbers $\frac{2}{3}$, -2.25, 3.6, and $-2\frac{1}{2}$ on the number line.



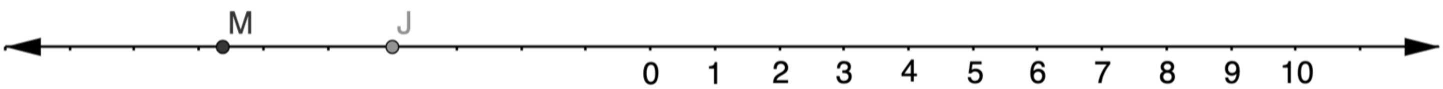
5. Plot the numbers $-\frac{5}{2}$, $4\frac{2}{3}$, and -1.25



6. Plot the numbers $\frac{7}{4}$, $-\frac{7}{8}$, and -1.2



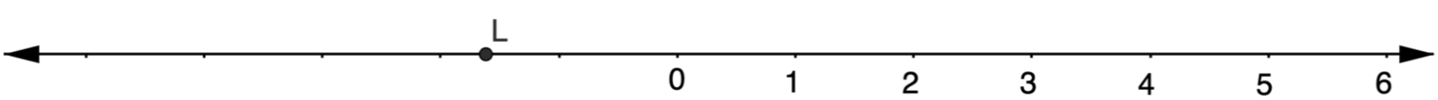
A number line with points M and J is shown.



7. Explain how to estimate the value of J.
Count markings, it is roughly 4 units left of zero. It is estimated to be -4.

8. Explain how to estimate the value of M.
It is between -6 and -7, slightly passed the midpoint of the two, so it is estimated to be $-6\frac{2}{3}$.

Jimmy and Luna both estimated the value of L on the number line shown.



9. Jimmy says the value of L is about $-2\frac{1}{3}$. Explain whether you agree with Jimmy.
Disagree. It is between -1 and -2, so it cannot be left of -2.

10. Luna says the value of L is about $1\frac{2}{3}$. Explain whether you agree with Luna.
Disagree. The point is to the left of zero so it must be negative.
