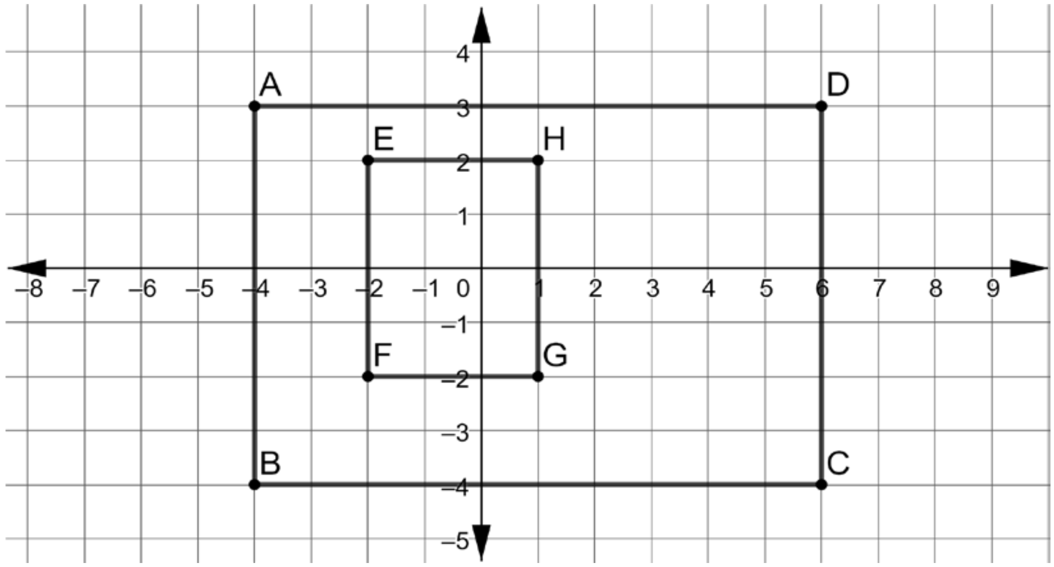
Grade 6
Unit 5
Lesson 6 Practice

Name_Answer Key________
Date___________________
Period__________________

For questions 1-3, use the rectangle shown.



1. What is the length of the line segment that connects points A and D?

   $|-4| + |6| =$ $\boxed{10 \text{ units}}$

2. What is the length of the line segment that connects points E and H?

   $|-2| + |1| =$ $\boxed{3 \text{ units}}$

3. What is the perimeter of rectangle $ABCD$?

   AD$= 10$
   DC$= |3| + |-4| = 7$
   $2(10) + 2(7) =$ $\boxed{34 \text{ units}}$

4. What is the perimeter of rectangle $EFGH$?

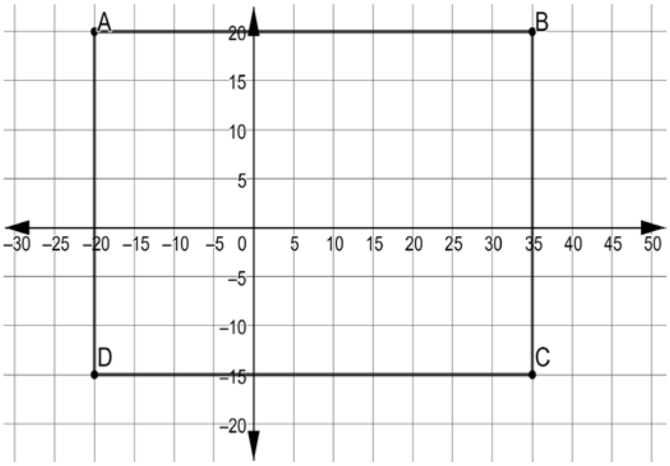
   EH$= 3$
   HG$= |2| + |-2| = 4$
   $2(3) + 2(4) =$ $\boxed{14 \text{ units}}$

5. What is the difference, in units, of the perimeter of rectangle $ABCD$ and rectangle $EFGH$?

   $34 - 14 =$ $\boxed{20 \text{ units}}$

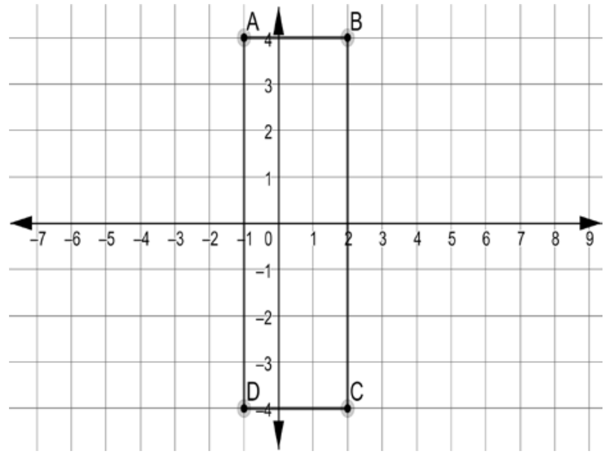
Find the perimeter.

6.



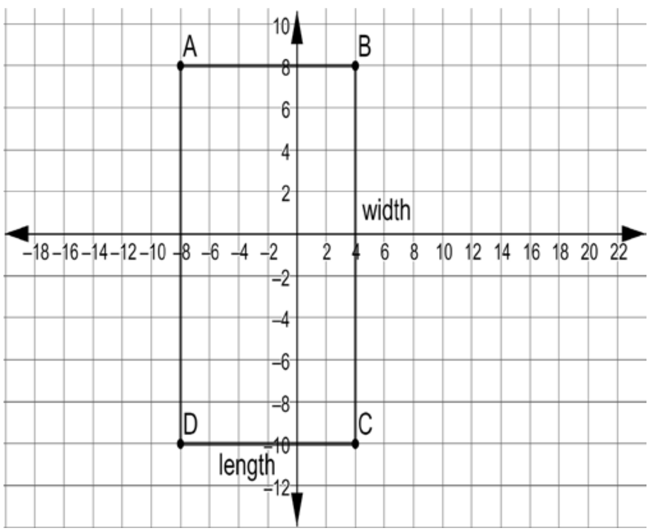
base: $|-20| + |35| = 55$
height: $|-15| + |20| = 35$
$2(55) + 2(35) = \boxed{180 \text{ units}}$

7.



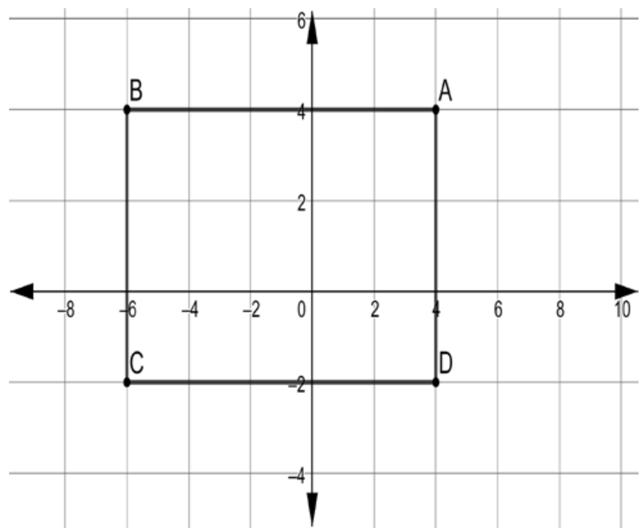
base: $|-1| + |2| = 3$
height: $|-4| + |4| = 8$
$2(3) + 2(8) = \boxed{22 \text{ units}}$

8.



base: $|-8| + |4| = 12$
height: $|-10| + |8| = 18$
$2(12) + 2(18) = \boxed{60 \text{ units}}$

9.



base: $|-6| + |4| = 10$
height: $|-2| + |4| = 6$
$2(10) + 2(6) = \boxed{32 \text{ units}}$

10. The vertices of a rectangle are at points $A\left(2\frac{1}{2}, 3\right)$, $B\left(-4\frac{1}{2}, 3\right)$, $C\left(-4\frac{1}{2}, -3\right)$, and $D\left(2\frac{1}{2}, -3\right)$. What is the perimeter, in units, of the rectangle?

base: $\left|2\frac{1}{2}\right| + \left|-4\frac{1}{2}\right| = 7$

height: $|3| + |-3| = 6$

$2(7) + 2(6) = \boxed{26 \text{ units}}$
