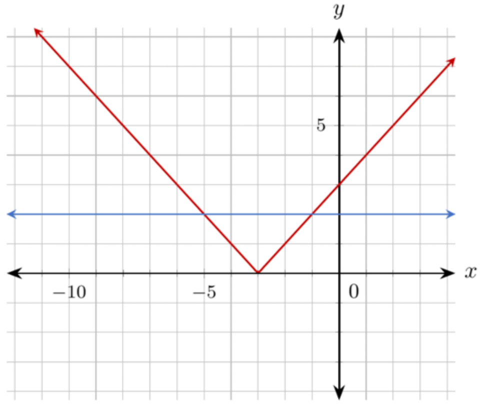
# Algebra 1: Unit 10, Lesson 3

1. The graphs of the line $y = 2$ and the absolute value function $y = |x + 3|$ are shown on the coordinate plane.



At what point(s) do the graphs of the line $y = 2$ and the absolute value function $y = |x + 3|$ intersect?

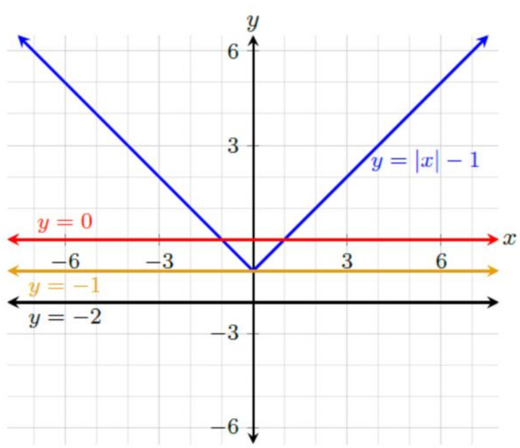
2. An absolute value equation is shown.

$|x| = 8$

Which of the following values satisfy the equation?

$-8, \quad 0, \quad 1, \quad 8, \quad 16$

3. The graph of the function $y = |x| - 1$ is shown, along with the lines $y = -2$, $y = -1$, and $y = 0$.



Complete the statements for the function $y = |x| - 1$.

There are no values for $x$ such that ________________________.
