Algebra 1 Name____________________
Unit 13 Date____________________
Lesson 3 Practice Period__________________

The table shows three different functions.

<table>
<tr><th>Function A</th><th>Function B</th><th>Function C</th></tr>
<tr>
<td>
<table>
<tr><th>x</th><th>y</th></tr>
<tr><td>-2</td><td>3</td></tr>
<tr><td>-1</td><td>6</td></tr>
<tr><td>0</td><td>9</td></tr>
<tr><td>1</td><td>12</td></tr>
<tr><td>2</td><td>15</td></tr>
</table>
</td>
<td></td>
<td>$y = 5(1.4)^x$</td>
</tr>
</table>

1. Determine which type of function that each represents.

Function A	Function B	Function C
o Exponential o Linear o Quadratic	o Exponential o Linear o Quadratic	o Exponential o Linear o Quadratic

2. Which function has the largest y-intercept?

3. Compare the ranges of the functions and indicate any similarities and differences.

4. Compare the domains of the functions and indicate any similarities and differences.

5. As $x \to \infty$, which function has larger values of y?

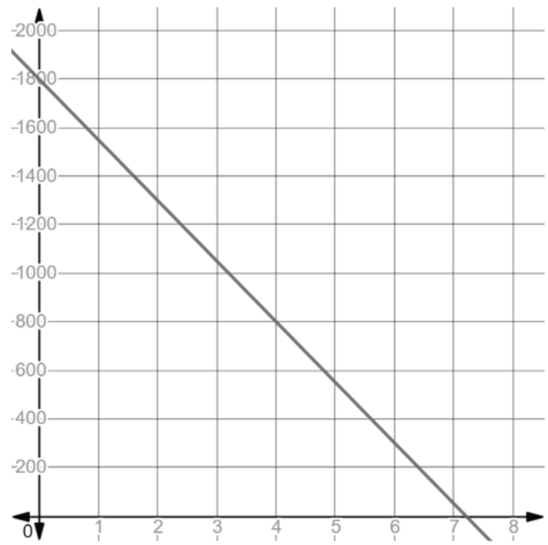
The table shows a table of values representing the revenue, in billions of dollars, from sales of digital movies, where $x = 0$ is 2010, and a graph representing the revenue, in billions of dollars, from sales of digital books, where $x = 0$ is 2010.

Digital Movie Sales (billions of $)	Digital Book Sales (billions of $)

Digital Movie Sales (billions of $)

x	y
0	2057.35
1	1833.96
2	1634.83
3	1457.32
4	1299.08

Digital Book Sales (billions of $)



6. Approximate the x-intercept for the function that represents the sale of digital books.

7. Interpret the x-intercept of the function that represents the sale of digital books.

8. What is the domain of the function representing the sale of digital books?

9. Which function has a larger y-intercept?

10. What type of function best describes the table of values that represents digital movie sales? Explain your choice.

- Exponential
- Linear
- Quadratic
