Grade 8
Unit 8
Lesson 6 Practice

Name____________________
Date____________________
Period____________________

Solve each equation, showing all your work.

1. $-2(n-3) = -2n + 6$	2. $5y + 8 - 2y = 4y - y + 5$
3. $4 - 3(j-2) = 3(-j-1)$	4. $3.5(2m + 8) = 9 + 3m - 1$
5. $\frac{6h+1}{4} = 2h - 3$	6. $\frac{2}{3}(12a + 9) = 2(4a + 3)$

7. $\frac{1}{2}w + 3 = \frac{3}{4}w - 4$	8. $0.6(3k + 1) - 0.1k = k + 1.8 + 0.7k$

9. For each of the equations in problems 1-8, determine whether it has one solution, no solutions, or infinitely many solutions. Write each equation in the appropriate box.

One Solution	**No Solutions**	**Infinitely Many Solutions**

10. Soledad solved the equation $3(2g - 15) = 5g + g - 45$ and claimed that there are no solutions to this equation. Her work is shown below. Explain whether you agree with Soledad.

$3(2g - 15) = 5g + g - 45$
$6g - 15 = 5g + g - 45$
$6g - 15 = 6g - 45$
$-15 = -45$
No Solution
