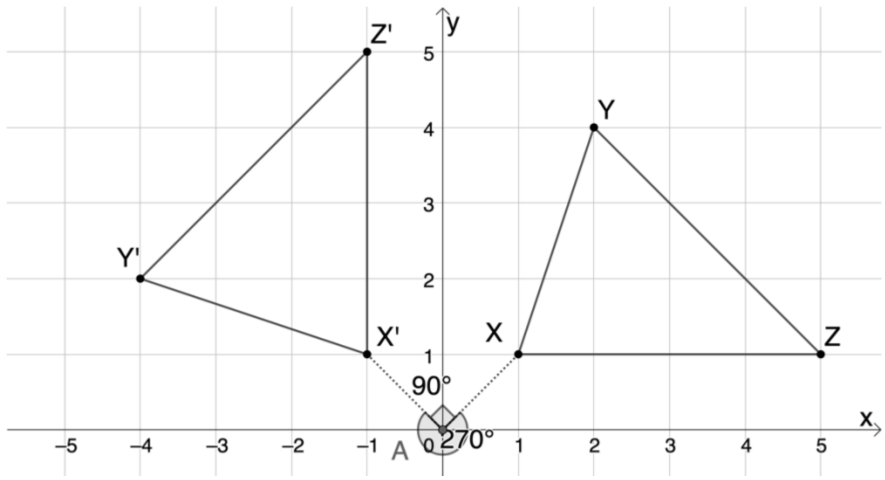
Grade 8	Name____________________
Unit 9	Date____________________
Lesson 5 Practice	Period____________________

On the coordinate plane shown, ΔXYZ is rotated to create $\Delta X'Y'Z'$. Use this image for questions 1-6.



There are two ways to describe the rotation. Complete both statements using the information in the given figure.

1. ΔXYZ is rotated ______° clockwise about the origin to create $\Delta X'Y'Z'$.

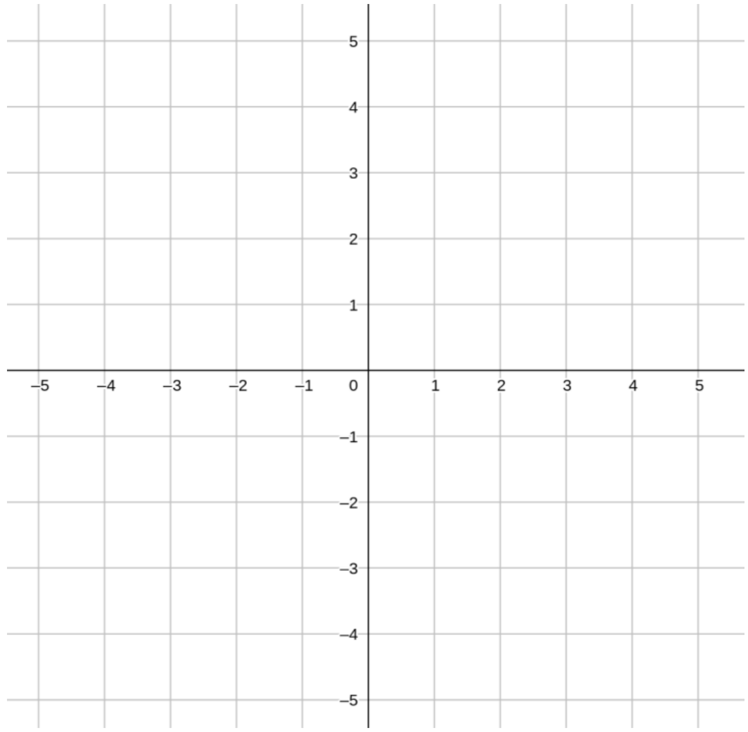
2. ΔXYZ is rotated ______° counterclockwise about the origin to create $\Delta X'Y'Z'$.

Complete the table with the coordinates of each vertex.

Coordinates		**Coordinates**	
3. Point X		**Point X'**	
4. Point Y		**Point Y'**	
5. Point Z		**Point Z'**	

6. Describe the relationship between the coordinates of the preimage and the image.

7. The vertices of ΔABC have their coordinates given in the below table. Plot ΔABC on the coordinate grid.



Rotate ΔABC $180°$ clockwise with the origin as the center of rotation. Label the image $\Delta A'B'C'$ and complete the table for the image.

Coordinates		Coordinates	
8. Point A	$(-3,1)$	**Point A'**	
9. Point B	$(-1,2)$	**Point B'**	
10. Point C	$(-2,-2)$	**Point C'**
