Algebra 1: Unit 10, Lesson 4

1. Amalia started solving the absolute value equation. She found one solution.

$$8 = |x+2| - 7$$
$$15 = |x+2|$$
$$15 = x+2 \qquad \text{and} \qquad -15 = x+2$$
$$13 = x \qquad \text{and} \qquad \_\_\_\_\_\_ = x$$

   What is the other solution?

2. An absolute value equation is shown. Complete the table.

$$|x-6| = -1$$

   How many solutions does the equation have?

3. The graph of the function $y = |x| - 1$ is shown, along with the lines $y = -2$, $y = -1$, and $y = 0$.

   Complete the statements for the function $y = |x| - 1$.

   There are no values for x such that __________________________.
