Algebra 1: Unit 9, Lesson 5

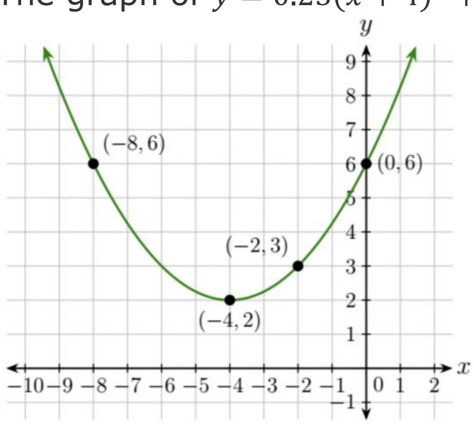
1. Luis is solving the equation, $8k^2 = 392$, but did not finish his work. Complete the final step to find the solutions to the equation.

$$8k^2 = 392$$
$$k^2 = \frac{392}{8}$$
$$k^2 = 49$$
$$\sqrt{k^2} = \pm\sqrt{49}$$
$$k = \_\_\_\_ ;\ k = \_\_\_\_$$

2. Find the value for p in the equation, $0 = 42p^2 - 672$, by completing the missing steps.

$$0 = 42p^2 - 672$$
$$672 = 42p^2$$
$$\frac{672}{42} = p^2$$
$$16 = p^2$$
$$\sqrt{16} = \sqrt{p^2}$$
$$\_\_\_\_\_\_\_\_ = p$$

3. The graph of $y = 0.25(x + 4)^2 + 2$ is shown.



The horizontal line, $y = 2$, shows that there is/are ________________ solution(s) for $0.25(x + 4)^2 + 2$.
