Grade 7
Unit 1 Assessment

Name____________________
Date_________________
Period__________

1. Select all of the questions that are statistical.
   - ☐ What is your favorite food?
   - ☐ What states have you visited?
   - ☐ What city is the capital of Florida?
   - ☐ How many languages do you speak fluently?
   - ☐ Which Florida college has a gator as a mascot?
   - ☐ Which Florida county produces the most oranges?
   - ☐ How many times have you been to Walt Disney World?

2. One Valencia orange tree can produce 275 oranges. A crate contains 25 oranges. Select all of the equations that could be used to determine the number of crates, x, the oranges from one Valencia tree can fill.
   - ☐ $\frac{x}{25} = 275$
   - ☐ $275 = 25x$
   - ☐ $275x = 25$
   - ☐ $\frac{x}{275} = 25$
   - ☐ $\frac{275}{x} = 25$
   - ☐ $\frac{275}{25} = x$

3. Marci hikes 15 miles in 6 hours on the Florida Trail.

   a. Find the unit rate. Include units.

Unit Rate	

   b. Interpret the unit rate for Marci's hike.

4. Professional basketball players tend to be taller than professional baseball players.

The two histograms, labeled A and B, show height distributions of 50 male professional baseball players and 50 male professional basketball players.

Histogram A	**Histogram B**
 Height (inches)	 Height (inches)

Complete the statements.

Given that professional basketball players tend to be taller than professional baseball players, histogram

○ A
○ B

represents the heights of professional baseball players. The height of the typical

○ baseball
○ basketball

player ranges from 70 to 90 inches.

5. There are 27 cats and dogs at an animal shelter. The ratio of cats to dogs is $4:5$. Write the ratio of the number of dogs to the total number of cats and dogs at the animal shelter.

Dogs : Total	

6. At a clothing store, a pair of jeans costs $\$40$. Using a coupon, Shanice is able to pay $\$10$ less than the original price.

Determine the percentage off the original price the coupon represents. Show your work in the space provided. Then, complete the statement.

	Work
The coupon gives Shanice _____$\%$ off of the original price.	

7. Select all of the expressions that are equivalent to $-12-(-2)$.

- ☐ $-12+(-2)$
- ☐ $-12+2$
- ☐ $-2+(-12)$
- ☐ $2-(-12)$
- ☐ $2-(12)$
- ☐ $12+(-2)$
- ☐ $-2-(-12)$

Solve each equation.

8. $-6x = 108$

9. $147 = b - (-12)$

$\boldsymbol{x} =$	

$\boldsymbol{b} =$	

10. $w + 28 = 17$

11. $-72 = \frac{y}{-2}$

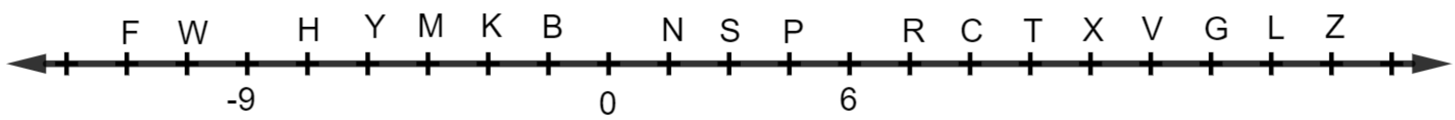
$\boldsymbol{w} =$	

$\boldsymbol{y} =$	

12. List the values $-2\frac{3}{20}, 89\%, -2.05, -\frac{9}{4}, 0.9,$ and $\frac{7}{8}$ from least to greatest.

Least to Greatest	

13. A number line is shown with points F, W, H, Y, M, K, B, N, S, P, R, C, T, X, V, G, L, and Z.



Complete the statement.

The absolute value of point

- ○ B
- ○ F
- ○ H
- ○ K
- ○ M
- ○ W

has the same value as

- ○ C
- ○ P
- ○ T
- ○ Y
- ○ Z

because the

- ○ distance
- ○ difference

between each point and

- ○ 0
- ○ its opposite

is the same.

Determine the value of each expression. If necessary, use the work space to show your work.

	Work
14. $(-3)(19) =$ _______________	

15. $179-(-53)=$ ________________	Work
16. $\frac{-63}{-7}=$ ________________	Work
17. $-16\cdot-6=$ ________________	Work

	Work
18. $(-1{,}457) + (-3{,}614) =$ ________________	
19. $-210 \div 35 =$ ________________	Work
20. $28 + (-28) =$ ________________	Work
