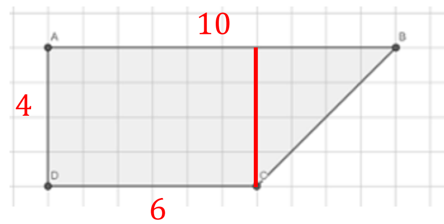
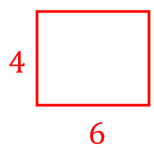
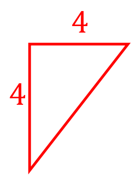
Grade 6 Accelerated Name___Answer Key______
Unit 7 Date____________________
Lesson 8 Practice Period___________________



1. Decompose the composite figure above into triangles and quadrilaterals.

2. Find the area of the composite figure in question 1 if each unit represents a yard.

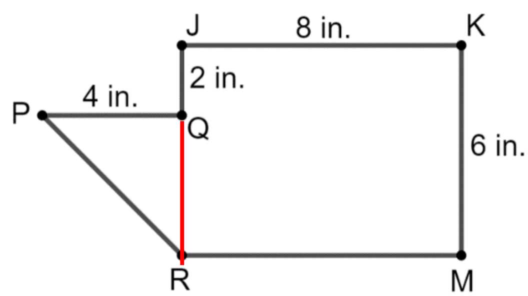




A of $\square = b \cdot h = 4 \cdot 6$
$= 24$

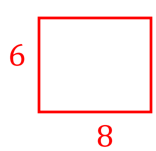
A of $\triangle = \frac{1}{2} \cdot b \cdot h = \frac{1}{2} \cdot 4 \cdot 4$
$= 8$

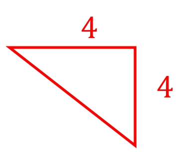
Added together: $24 + 8 = 32$ yd²



3. Decompose the composite figure above into triangles and quadrilaterals.

4. Find the area of the composite figure in question 3.

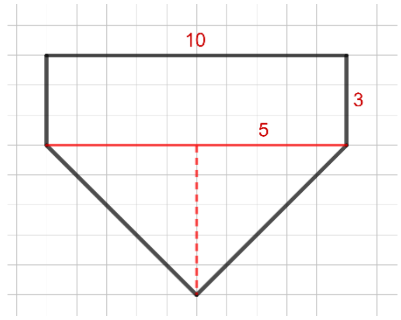




A of $\square = b \cdot h = 6 \cdot 8$
$= 48$

A of $\triangle = \frac{1}{2} \cdot b \cdot h = \frac{1}{2} \cdot 4 \cdot 4$
$= 8$

Added together: $48 + 8 = 56$ in²



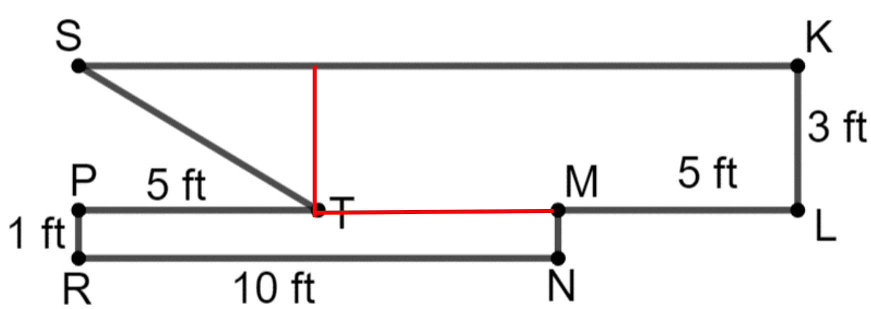
5. Decompose the image above into triangles and quadrilaterals.

6. Find the area of the composite figure in question 5, if each unit represents an inch.

A of $\square = b \cdot h = 10 \cdot 3$
$= 30$

A of $\triangle = \frac{1}{2} \cdot b \cdot h = \frac{1}{2} \cdot 10 \cdot 5$
$= 25$

Added together: $30 + 25 = 55$ in$^2$



7. Decompose the image above into triangles and quadrilaterals.

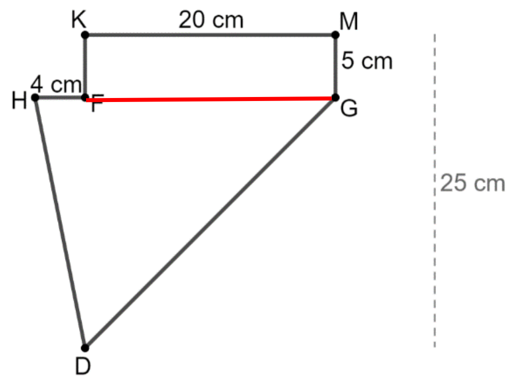
8. Find the area of the image in question 7.

A of $\square = b \cdot h = 1 \cdot 10 = 10$

A of $\square = b \cdot h = 3 \cdot 10 = 30$

A of $\triangle = \frac{1}{2} \cdot b \cdot h = \frac{1}{2} \cdot 5 \cdot 3 = 7.5$

Add together: $10 + 30 + 7.5 = 47.5$ ft$^2$



9. Decompose the image above into triangles and quadrilaterals.

10. Find the area of the composite figure in question 9.

$25 - 5 = 20 =$ height of $\triangle$ $\quad$ $20 + 4 = 24 =$ length of $\triangle$

A of $\triangle = \frac{1}{2} \cdot b \cdot h$

$= \frac{1}{2} \cdot 24 \cdot 20$

$= 12 \cdot 20$

$= 240$

A of $\square = b \cdot h$

$= 20 \cdot 5$

$= 100$

A of $\triangle$ + A of $\square = 240 + 100$

$= 340$ cm$^2$
