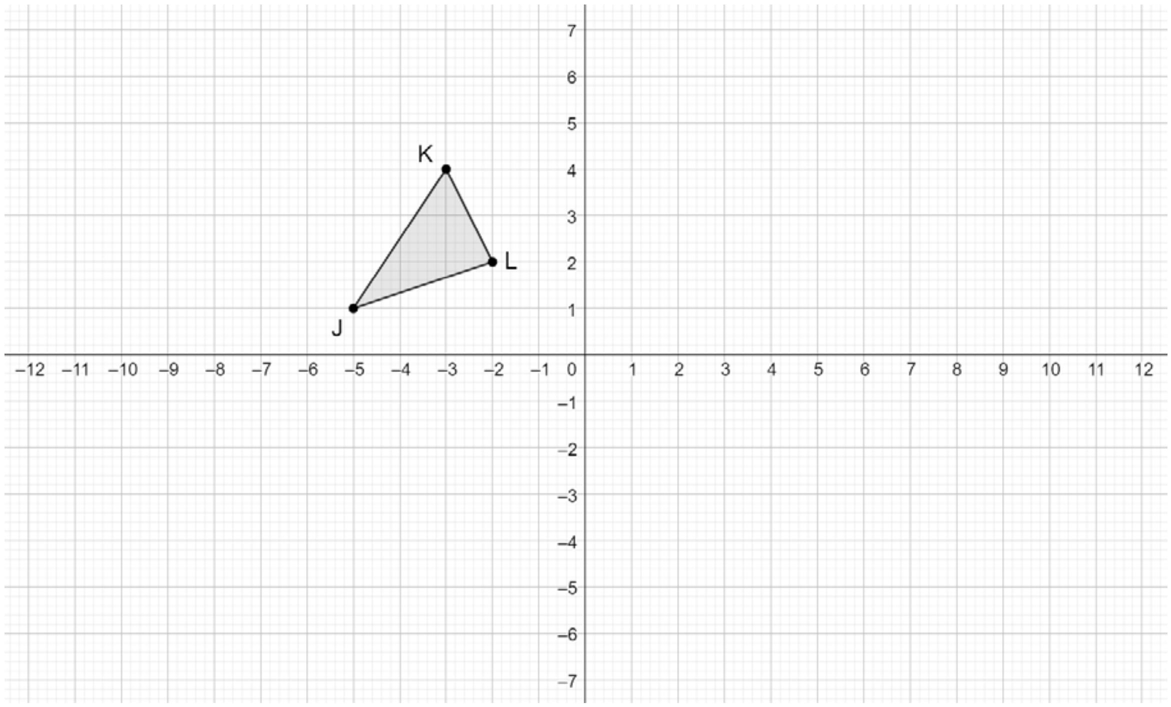
$\triangle JKL$ is shown.



Draw the result of each transformation in the following sequence:

1. $\triangle J'K'L'$ as a result of $(x, y) \rightarrow (y, -x)$

2. $\triangle J''K''L''$ as a result of $(x, y) \rightarrow \left(\frac{3}{2}x, \frac{3}{2}y\right)$

3. $\triangle J'''K'''L'''$ as a result of $(x, y) \rightarrow (x, -y)$

Indicate the correct relationship for the resulting image:

4. Image $\triangle J'K'L'$ is
   - o congruent
   - o similar

   to preimage $\triangle JKL$.

5. Image $\triangle J''K''L''$ is
   - o congruent
   - o similar

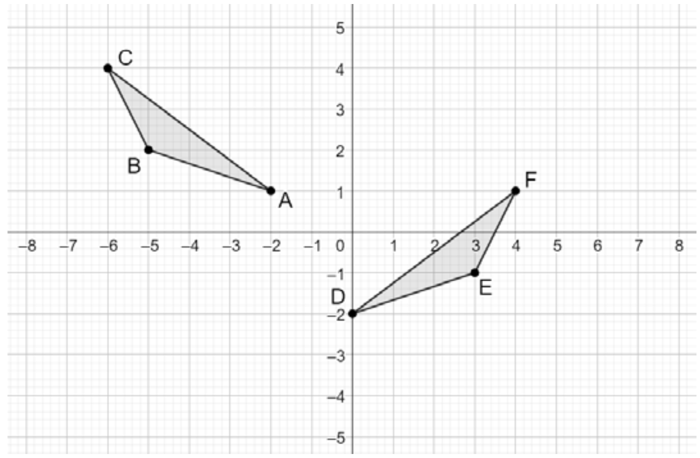
   to preimage $\triangle JKL$.

6. Image $\triangle J'''K'''L'''$ is
   - o congruent
   - o similar

   to preimage $\triangle JKL$.

$\triangle ABC$ and $\triangle DEF$ are shown.

Assume: $\frac{AB}{DE} = \frac{BC}{EF} = \frac{AC}{DF}$



7. Write a series of transformations that will map $\triangle ABC$ onto $\triangle DEF$ so that $\triangle ABD \sim \triangle DEF$.

8. If it is given that $\triangle DEF$ is a result of $(x, y) \rightarrow (-x, y)$ then $(x, y) \rightarrow (x - 2, y - 3)$, then the triangles are

- o congruent
- o similar

.

$\triangle PQR$ and $\triangle TVR$ are shown.

Complete the table:

	If Given	True or False? $\triangle PQR \sim \triangle TVR$ by AA Similarity	Justification
9.	$\frac{TR}{PR} = \frac{VR}{QR}$	o True o False	
10.	$\overline{PQ} \parallel \overline{VT}$	o True o False
