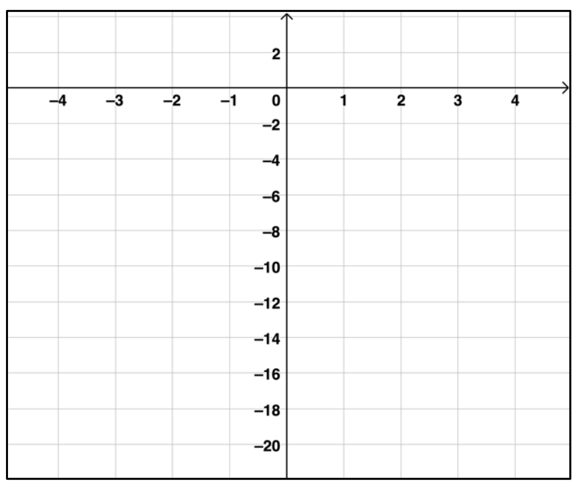
Grade 8 Name____________________
Unit 10 Date____________________
Lesson 8 Practice Period__________________

Use the function $y = -2x^2$ to answer problems 1–4.

1. Complete the table of values to represent the function.

x	y
-3	
-1	-2
	-0
1	
	-8

2. Graph the points from the table and create a rough sketch of the function by connecting the points.



3. In the function $y = -2x^2$, which x-values will produce the y-value of -50?

4. Did the function $y = -2x^2$ represent a linear function? Using your conjecture from the lesson why do you think this is true?

Create a table of values for each function.

5. $y = x^2 + 2$

x	y

6. $y = 3x - 10$

x	y

7. $y = x^3 - 3$

x	y

Create a graph for each function.

8.

x	y
-2	-1
-1	0
0	1
1	2
2	3

9.

x	y
-2	-2
-1	-2
0	-2
1	-2
2	-2

10.

x	y
-2	10
-1	7
0	4
1	1
2	-2
