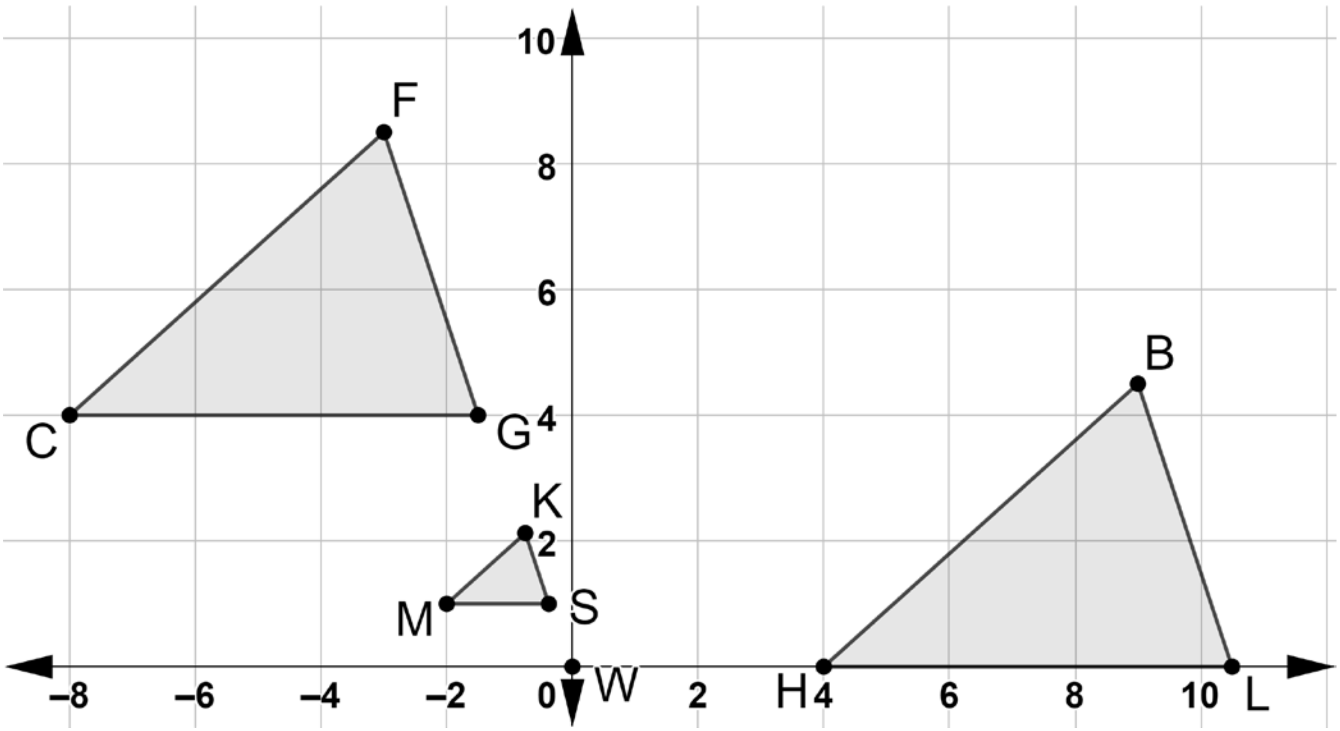
Geometry
Unit 1
Lesson 7 Homework

Name Answer Key_________
Date____________________
Period___________________

Three triangles are shown on the coordinate grid. $\triangle LBH$ and $\triangle SKM$ are created using a single transformation of $\triangle GFC$.



Complete each statement using an angle or a segment from $\triangle GFC$.

1. $\overline{LB} \cong \overline{GF}$

2. $\overline{SM} \sim \overline{GC}$

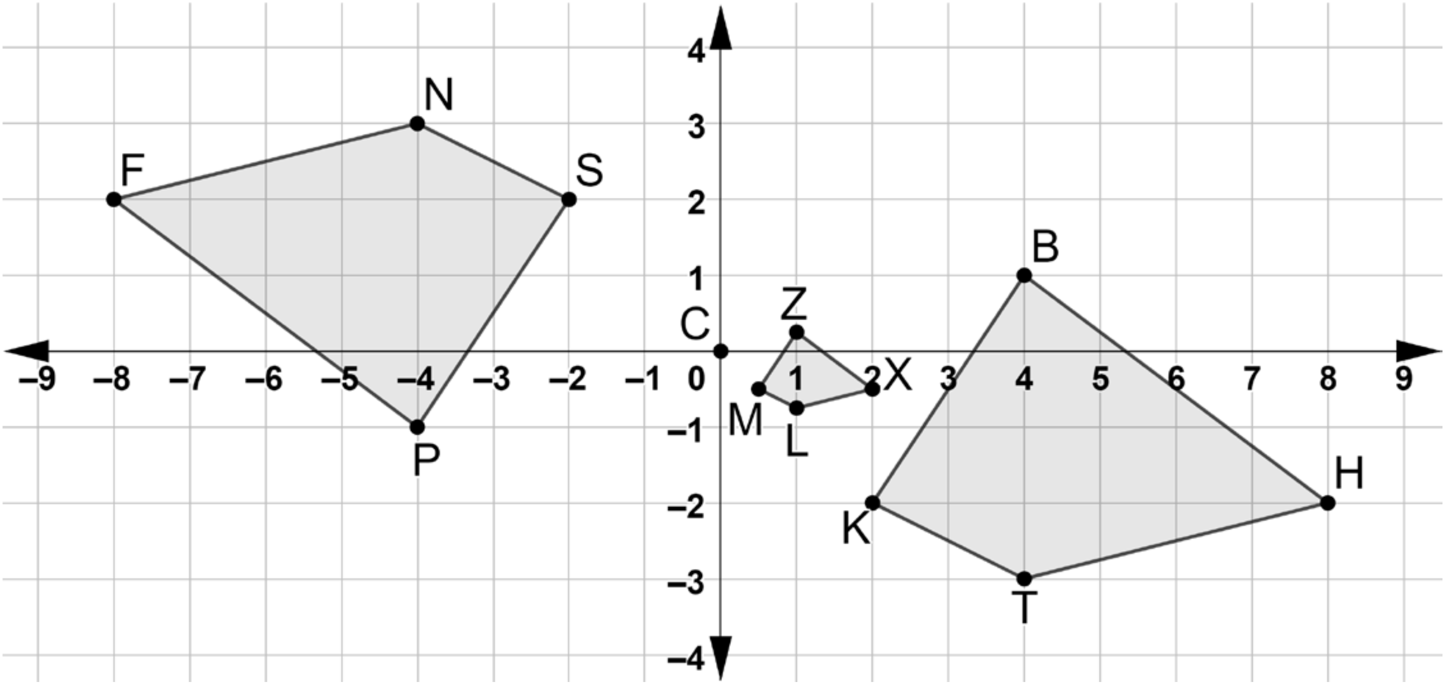
3. $\overline{BH} \cong \overline{FC}$

4. $\overline{LH} \cong \overline{GC}$

5. $\overline{MK} \sim \overline{CF}$

6. $\overline{SK} \sim \overline{GF}$

Three quadrilaterals are shown on the coordinate grid. Quadrilaterals $PFNS$ and $ZXLM$ are created using a single transformation of quadrilateral $BHTK$.



Complete the following statements with the ≅ or ~ symbol.

7. $\angle MLX \cong \angle KTH$

8. $\overline{HB} \cong \overline{PF}$

9. $\overline{ZM} \sim \overline{BK}$

10. $\angle BHT \cong \angle NFP$
