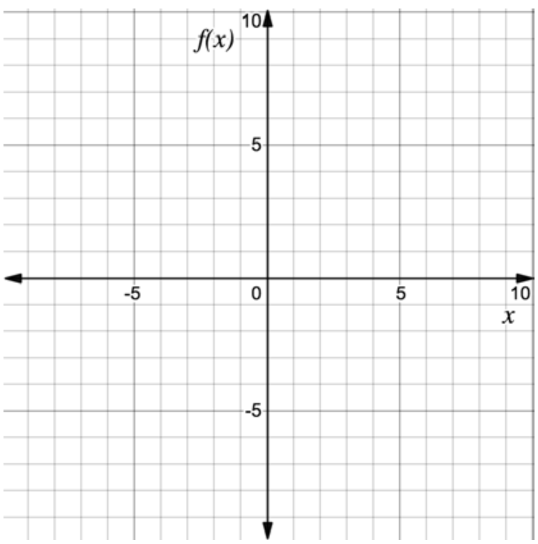
Lesson 1 Homework Period____________________

For questions 1-8, consider the absolute value function $f(x) = |x + 3| - 1$.

1. Complete the table of values for $f(x) = |x + 3| - 1$.

x	-6	-5	-4	-3	-2	-1	0
$f(x)$							

2. Use the table of values to graph $f(x) = |x + 3| - 1$ on the coordinate grid.



3. What is the vertex of $f(x) = |x + 3| - 1$?

4. What is the equation for the axis of symmetry of $f(x) = |x + 3| - 1$?

5. What are the x and y-intercept(s) of $f(x) = |x + 3| - 1$?

6. What are the domain and range of $f(x) = |x + 3| - 1$?

7. Identify the intervals on which the function $f(x) = |x + 3| - 1$ is increasing and/or decreasing.

8. Identify the intervals on which the function $f(x) = |x+3| - 1$ is positive and negative.

For questions 9-10, consider the absolute value function $f(x) = |x-1| - 5$.

9. Complete the table of values for $f(x) = |x-1| - 5$.

x	-2	-1	0	1	2	3	4
$f(x)$							

10. Use the table of values to graph $f(x) = |x-1| - 5$ on the coordinate grid.
