Grade 6 Name____Answer Key_____
Unit 12 Date___________________
Lesson 2 Practice Period__________________

Solve.

1. $5 \cdot \frac{1}{5} \cdot b = \frac{7}{10} \cdot 5$

$b = \frac{35}{10}$ or $b = 3\frac{1}{2}$

2. $4 = g - \frac{1}{4}$

$+\frac{1}{4} \quad +\frac{1}{4}$

$g = 4\frac{1}{4}$

3. $p \div \frac{14}{15} = 2$

$\frac{p}{\frac{14}{15}} = 2$

$p = 2 \cdot \left(\frac{14}{15}\right)$

$p = \frac{28}{14} = 1\frac{13}{15}$

4. $\frac{1}{2} = 4\frac{1}{2} + t$

$-4\frac{1}{2} \quad -4\frac{1}{2}$

$-4 = t$

5. $c + 1\frac{1}{4} = 2\frac{1}{6}$

$-1\frac{1}{4} \quad -1\frac{1}{4}$

$c = \frac{11}{12}$

6. $4 \cdot \frac{1}{4} r = \frac{5}{36} \cdot 4$

$r = \frac{20}{36}$ or $\frac{5}{9}$

7. In preparation for a party, Suzanne filled four equal sized candy jars with $3\frac{2}{3}$ cups of various candies. How many cups of candy did Suzanne use?

$c \div 4 = 3\frac{2}{3}$

Suzanne used $14\frac{2}{3}$ cups of candy.

$c = 4 \cdot 3\frac{2}{3}$

$c = 4 \cdot \frac{11}{3} = \frac{44}{3}$

$c = 14\frac{2}{3}$

8. After lighting a candle, $\frac{3}{8}$ inches of it were burned before it was put out, leaving $2\frac{1}{6}$ inches of the candle remaining. How long was the candle before it was lit?

$c - \frac{3}{8} = 2\frac{1}{6}$

$+\frac{3}{8} \quad +\frac{3}{8}$

$c = 2\frac{13}{24}$

The candle was $2\frac{13}{24}$ inches before it was lit.

9. A 20 ounce soda bottle has $12\frac{2}{5}$ ounces remaining. How much soda was removed from the bottle?

$20 - s = 12\frac{2}{5}$

$+s \quad +s$

$20 = 12\frac{2}{5} + s$

$-12\frac{2}{5} \quad -12\frac{2}{5}$

$7\frac{3}{5} = s$

$7\frac{3}{5}$ ounces of soda were removed from the bottle.

10. A wedding dress designer orders $5\frac{1}{8}$ yards of lace to enhance a client's veil. After making the enhancements, they have $2\frac{3}{4}$ yards of lace left. How much lace was used for the veil?

$2\frac{3}{8}$ yards of lace were used for the veil.

$5\frac{1}{8} - v = 2\frac{3}{4}$

$+v \quad +v$

$5\frac{1}{8} = v + 2\frac{3}{4}$

$-2\frac{3}{4} \quad -2\frac{3}{4}$

$\frac{19}{8} = v$ or $v = 2\frac{3}{8}$
