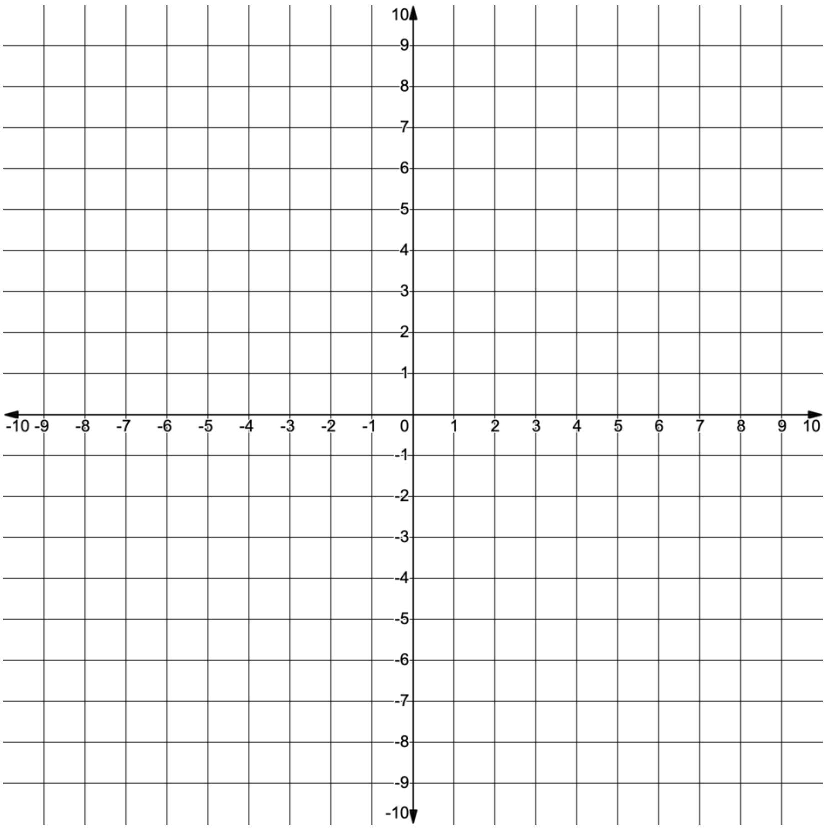
Grade 8 Name____________________
Unit 8 Date____________________
Lesson 9 Practice Period___________________

Use the coordinate grid to complete questions 1-4.



1. Graph the equation $y = -\frac{3}{5}x + 1$.

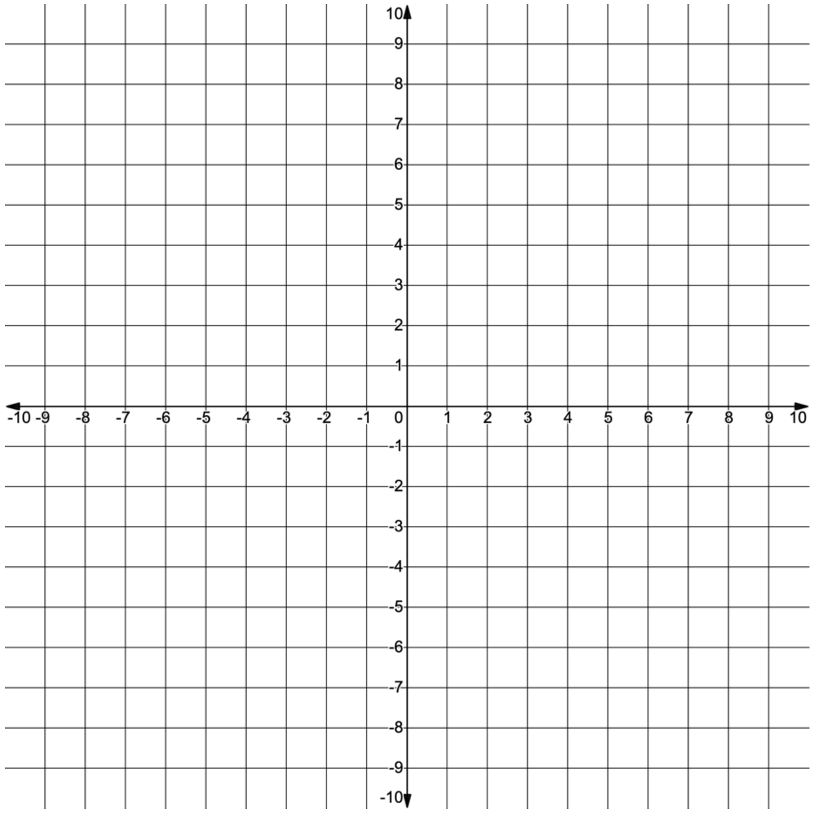
2. Graph the equation $y = x - 7$.

3. Based on your work for questions 1 & 2, what is the solution to the system of equations $\begin{cases} y = -\frac{3}{5}x + 1 \\ y = x - 7 \end{cases}$?

4. Use substitution to show that the solution you identified in question 3 satisfies both equations in the system of equations.

$\boldsymbol{y = -\frac{3}{5}x + 1}$	$\boldsymbol{y = x - 7}$

Use the coordinate grid to complete questions 5-7.

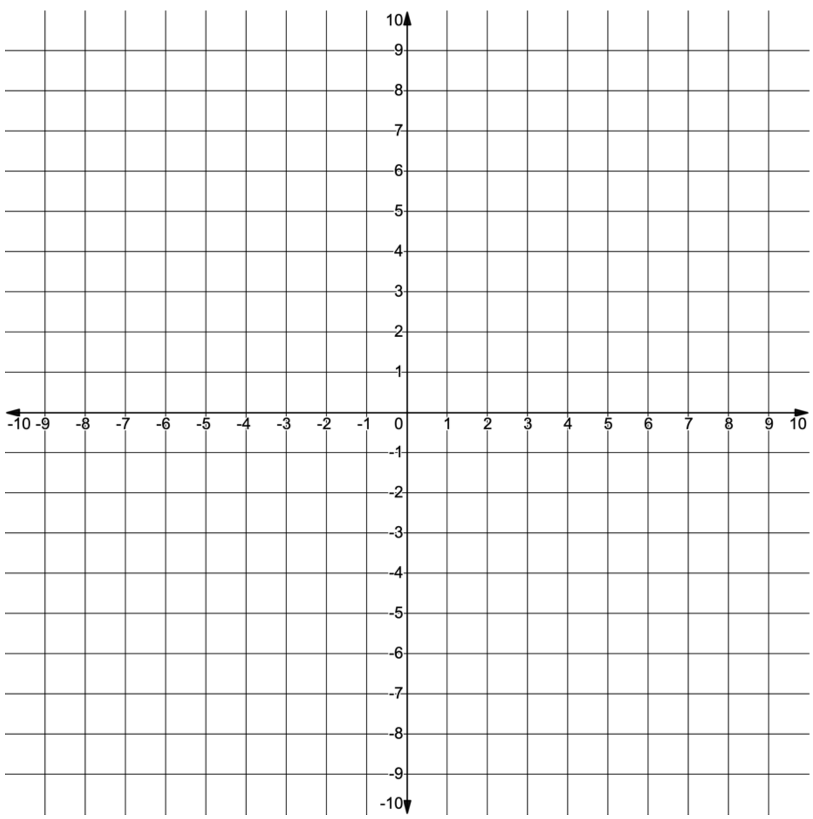


5. Graph the system of equations $\begin{cases} y = \frac{3}{4}x - 4 \\ y = 3x + 5 \end{cases}$.

6. What is the solution to the system of equations $\begin{cases} y = \frac{3}{4}x - 4 \\ y = 3x + 5 \end{cases}$?

7. Use substitution to show that the solution you identified both equations in the system of equations.

Use the coordinate grid to complete questions 8-10.



8. Graph the system of equations $\begin{cases} y = -2x + 3 \\ y = -2x + 7 \end{cases}$.

9. Complete the statement: The two lines in the system of equations

   - o are parallel
   - o intersect
   - o coincide

10. Describe the solution set to the system of equations $\begin{cases} y = -2x + 3 \\ y = -2x + 7 \end{cases}$.
