

Unit 12: Worked Examples

1. A local gym surveyed 600 of its members to determine which activities they come to the gym to participate in. How many of the members come to the gym for swimming?

$$600 \cdot 0.03 = \underline{18}$$

2. A concert ticket that normally costs \$128 is on sale for 16% off. What is the new price of the ticket?

$$.84(128) = \$107.52$$

3. A school had 1,450 students last year and only 1,237 students this year. What was the percentage decrease in the number of students?

$$1450 - 1237 = 213 \quad \frac{213}{1450} = 0.14689 = 14.69\%$$

4. How much will someone earn after 3 years with an account that starts with \$3,000 that has a 2% simple interest rate?

$$3000 \cdot (0.02) = 60$$
$$\begin{array}{r} 13 \\ \hline \$180 \end{array}$$
