

Grade 8
Unit 2
Lesson 3 Practice

Name Answer Key
Date _____
Period _____

1. The volume of this  is 64 cm³ because 4 × 4 × 4 = 64.

2. Identify the first 5 perfect cubes.

1, 8, 27, 64, 125

3. A cube has a volume of 64 in³. What is the measure of one of its sides?

4 in

4. The following graphs below represent $y = x^2$ and $y = x^3$. The graph of $y = x^2$ only has positive y -values, while the graph of $y = x^3$ has both positive and negative y -values. Use coordinates from each graph to explain why this happens.

$$y = x^2$$

$$(2, 4) \rightarrow 4 = (2)^2$$

$$(-2, 4) \rightarrow 4 = (-2)^2$$

$$y = x^3$$

$$(-1, -1) \rightarrow -1 = (-1)^3$$

$$(-2, -8) \rightarrow -8 = (-2)^3$$

Find the value of each of the following.

5. $\sqrt[3]{-8}$ -2

6. $\sqrt[3]{216}$ 6

7. $\sqrt[3]{64}$ 4

Solve each equation.

8. $x^3 = 1,728$
 $x = 12$

9. $c^3 = -1$
 $c = -1$

10. $m^3 = -343$
 $m = -7$
