Unit 5
Lesson 5 Practice

Name _____
Date _____
Period _____

1. Is it possible for a triangle to have sides length of 8 in., 14 in., and 19 in.? Justify your reasoning.

For questions 2–4, determine if the following sets of side length can form a triangle.

2. 12 cm., 3 cm., 7 cm.

3. 9 m., 10 m., 14 m.

4. 5.1 ft., 15 ft., 20 ft.

In questions 5–8, two side lengths of a triangle are given. Determine a third side that could be used to form a triangle.

5. 2, 5, _____

6. 45, 36, _____

7. 9.4, 6.2, _____

8. 70, 140, _____

9. Ava has four sets of straws to use to form triangles. Which of the sets could not be used?

Set 1: {3 cm, 4 cm, 5 cm}

Set 2: {1 cm, 5 cm, 6 cm}

Set 3: {2 cm, 2 cm, 2 cm}

Set 4: {4 cm, 3 cm, 6 cm}

10. When designing a kitchen, a triangle should be formed between the sink, the oven, and the refrigerator. If the distance from the oven to the refrigerator is 4 feet and the distance from the sink to the refrigerator is 6 feet, determine a possible distance between the sink and the oven.
