

Grade 8
Unit 5
Lesson 8 Practice

Name _____
Date _____
Period _____

1. Find the horizontal distance between the points $(-1, 8)$ and $(-7, 5)$.

2. To find the horizontal distance on the coordinate plane, find the between the

- ☐ y – coordinates.
- ☐ x – coordinates.

- ☐ difference
- ☐ sum

3. Find the vertical distance between the points $(-1, 8)$ and $(-7, 5)$.

4. To find the vertical distance on the coordinate plane, find the between the

- ☐ y – coordinates.
- ☐ x – coordinates.

- ☐ difference
- ☐ sum

Use Triangle HUS for questions 5 – 9.

Triangle HUS is defined by the following vertices in the coordinate plane.

Point H $(2, 1)$

Point U $(-1, 6)$

Point S $(-1, 1)$

5. Graph Triangle HUS .

6. Find the length of the horizontal leg of Triangle HUS . Label the length of the leg on the graph.
7. Find the length of the vertical leg of Triangle HUS . Label the length of the leg on the graph.
8. Use the Pythagorean Theorem to find the length of $\overline{HU}$. Round to the nearest tenth.
9. Find the perimeter of Triangle HUS .

10. Triangle ABC is defined by the vertices.

$A (-7, 1)$

$B (0, 5)$

$C (0, 1)$

Find the perimeter of Triangle PGF . Round to the nearest tenth, if needed.
