

Triangle ABC and FGE are shown.

1. Which segment corresponds with segment AB ?
2. Which segment corresponds with segment BC ?
3. Which segment corresponds with segment AC ?
4. Is there a constant of proportionality that exists with these triangles? If so, what is it?
5. Are these two triangles similar? Why or why not?
6. Label triangle PKR so that it is similar to triangle FGE .

Triangle NBT is similar to triangle YLD .

7. Which segment corresponds with segment LD ?
8. What is the constant of proportionality between triangle NBT and triangle YLD ?
9. What is the length of side YD ?
10. What is the length of side LY ?
