

For questions 1–3 use the equation to graph the two-variable linear relationship:

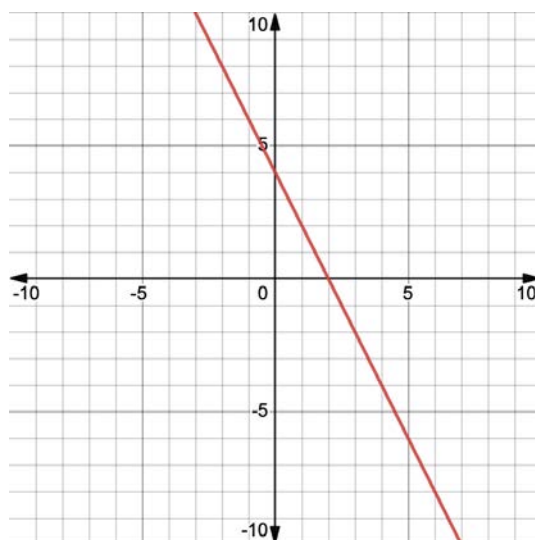

1. Complete the table.

Equation	Slope	y-intercept
$y = -2x + 4$	-2	4

2. Write the y-intercept as a coordinate pair.

(0 , 4)

3. Graph the equation.

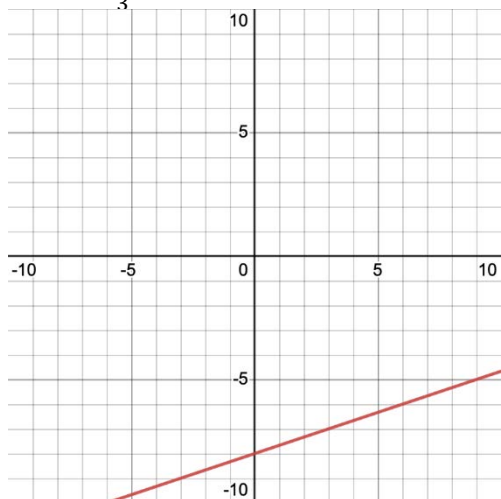

4. Use the equation to complete the table of values.

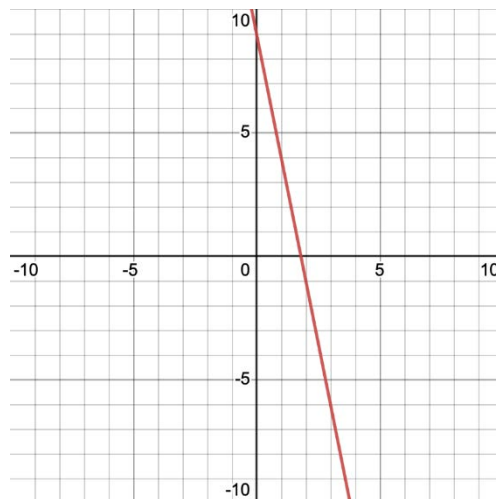

Equation	Table of Values								
$2x - 4y = 8$	<table> <tr> <th>x</th><th>y</th></tr> <tr> <td>4</td><td>0</td></tr> <tr> <td>0</td><td>-2</td></tr> <tr> <td>1</td><td>-1.5 or $-\frac{3}{2}$</td></tr> </table>	x	y	4	0	0	-2	1	-1.5 or $-\frac{3}{2}$
x	y								
4	0								
0	-2								
1	-1.5 or $-\frac{3}{2}$								

Graph.

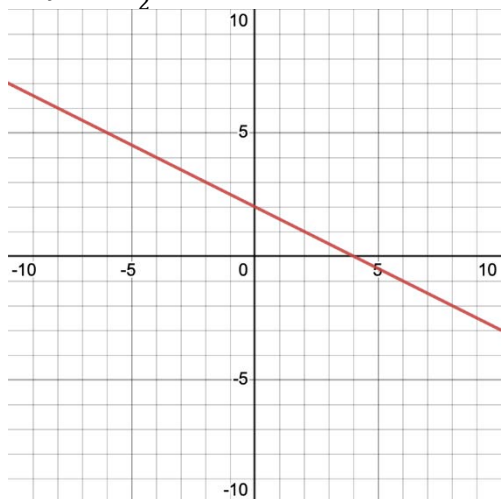

5. $y = \frac{1}{3}x - 8$

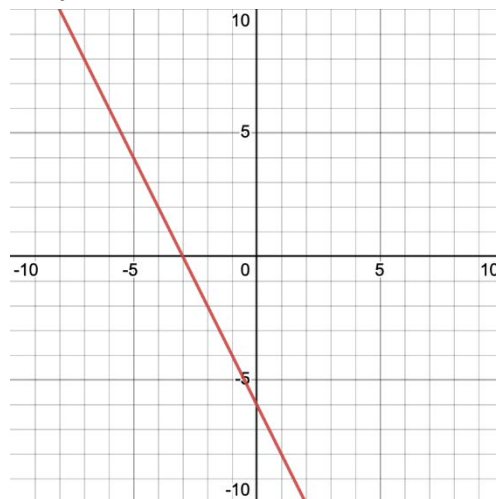

6. $y = -5x + 9$

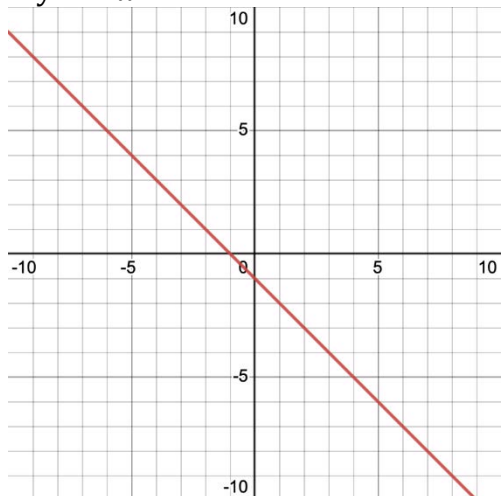

7. $y = -\frac{1}{2}x + 2$

8. $y = -2x - 6$

9. $y = -x - 1$

10. $y = -2x$
