Period _____

Use the following graph to answer problems 1–6:

1. Write the equation of line A in slope-intercept form.
2. Write the equation of line B in slope-intercept form.
3. Which line is formed from the equation $2x - 4y = 8$?
4. Write the equation of line C in slope-intercept form.
5. Explain why the equation of line D has no y -intercept.
6. Write the equation of line D.

Find the slope and y-intercept of each line. Then, write the equation of each line in slope-intercept form:
