

Drew and Jessie are competing in their school's Ultimate Obstacle Ninja Challenge. The graphs below show their distances from the start of the Challenge over time. Use the graphs to complete questions 1–5:

Complete the table. Answer each question by selecting one or both ninjas.

	Drew	Jessie
1. This ninja stopped for a break.	☒	☒
2. This ninja ran faster between 0 and 2 minutes.	☒	☐
3. This ninja stopped for 1 minute.	☐	☒
4. This ninja ran faster between 3 and 4 minutes.	☐	☒
5. This ninja finished in 9 minutes.	☒	☒
6. This ninja won the competition. They tied.	☒	☒

Fraya hiked Iron Mountain yesterday and stopped at the top for lunch. This graph shows her elevation over the time period.

7. Complete the paragraph by filling in the correct numbers.

Fraya hiked 150 feet in the first 20 minutes. Then, her speed slowed down for the next 20 minutes. After 40 minutes she increased her speed to get to the top. She stopped at the top for 20 minutes and then began her descent.

8. Based on the graph how tall is Iron Mountain?

300 ft

9. When did Fraya start to descend?

70 minutes

10. If Fraya continues the same speed approximately how long will it take her to reach the bottom from the top on her decent?

Top = 70 minutes

Bottom $\approx$ 130 minutes

$130 - 70 = 60$ minutes
