

The table shows the percentage of canceled flights from 2012 to 2021 at Tampa International Airport.

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021
Canceled Flights (%)	0.6	0.5	1.1	0.9	0.8	1.9	1.0	1.3	6.3	1.7

1. Identify the independent and dependent variable in this context.

Independent: Year

Dependent: Canceled Flights

2. Determine an appropriate scale for each axis.

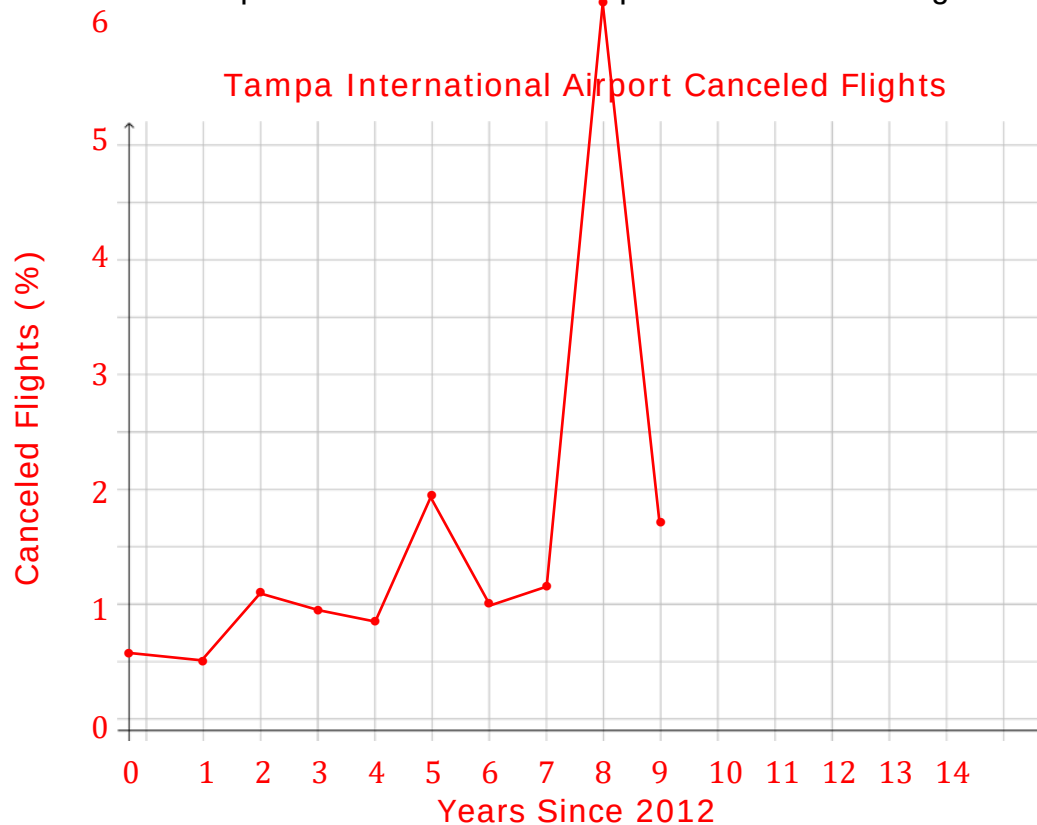

Years since 2012 (So, 0 represents 2012, etc.)

$0 \leq x \leq 14$ or $[0,14]$

Canceled flights: $0 \leq y \leq 10$ or $[0,10]$

3. Label the title to the graph and the axes.

4. Plot the points and connect the points in order using a straight edge.

5. Describe the trend on this line graph.

Overall, as the number of years since 2012 increases, the percentage of canceled flights somewhat increases.

The table shows the amount of alternative-fueled vehicles in the United States from 1992 to 1999.

Year	1992	1993	1994	1995	1996	1997	1998	1999
Total Alt-Fueled Vehicles (in thousands)	251	315	324	333	352	368	384	408

6. Identify the independent and dependent variable in this context.

Independent: Year

Dependent: Total Alternative-Fueled Vehicles

7. Determine an appropriate scale for each axis.

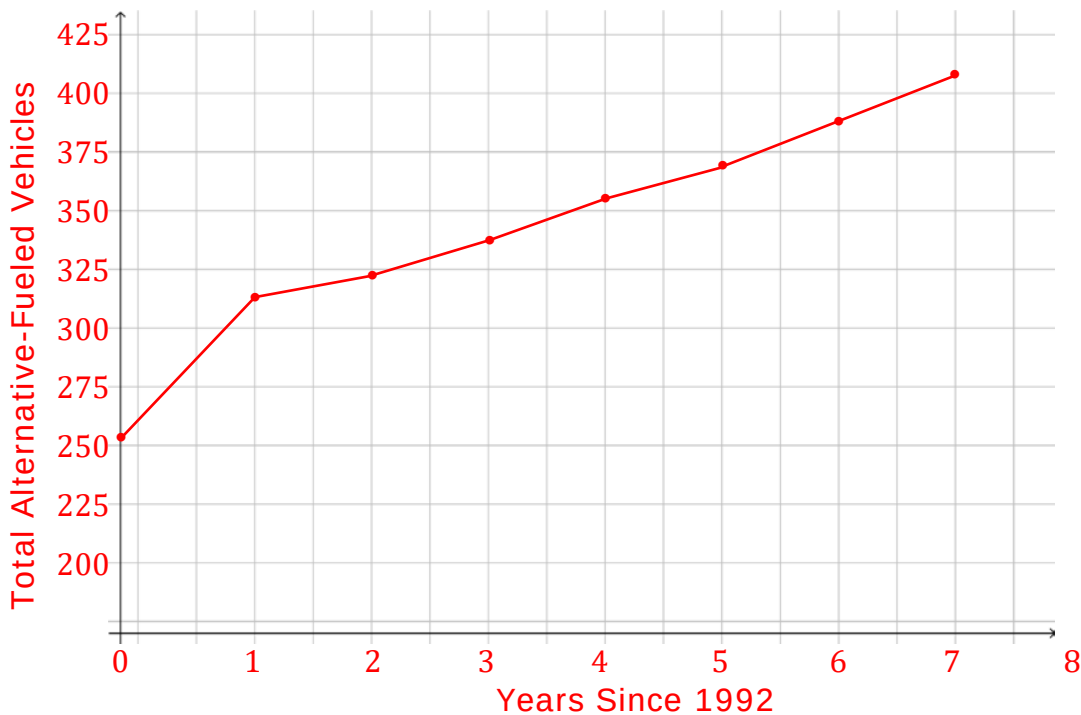

Years since 1992: $0 \leq x \leq 8$

Total alternative-fueled vehicles: $200 \leq y \leq 425$

8. Label the title to the graph and the axes.

9. Plot the points and connect the points in order using a straight edge.

United States Alternative-Fueled Vehicles 1992-1999

10. Describe the trend on this line graph.

As the years since 1992 increase, the total number of alternative-fueled vehicles in the U.S. increases.
