

Grade 8
Unit 11
Lesson 6 Practice

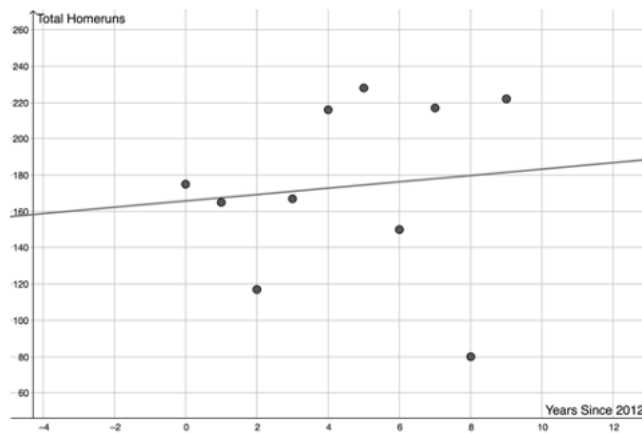

Name _____
Date _____
Period _____

The scatter plot shows the total amount of homeruns made by the Tampa Bay Rays in regular seasons from 2012 to 2021.

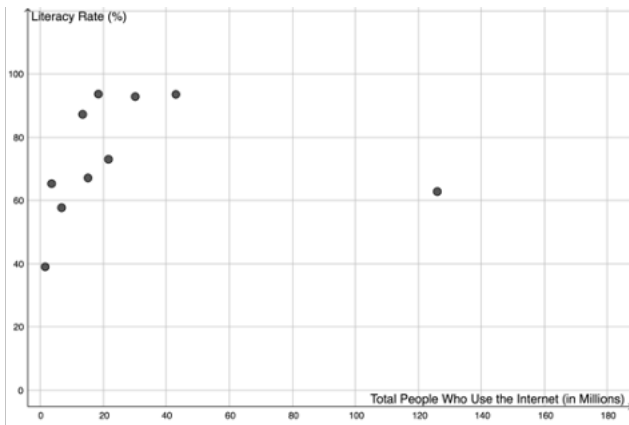

1. The point (4,216) is on the scatter plot. Interpret the meaning of this point in context.
2. Describe the association between the years since 2012 and the total home runs made.

Suppose the line shown is fit to the data. The equation of the line of fit is $y = 1.8x + 165.8$.

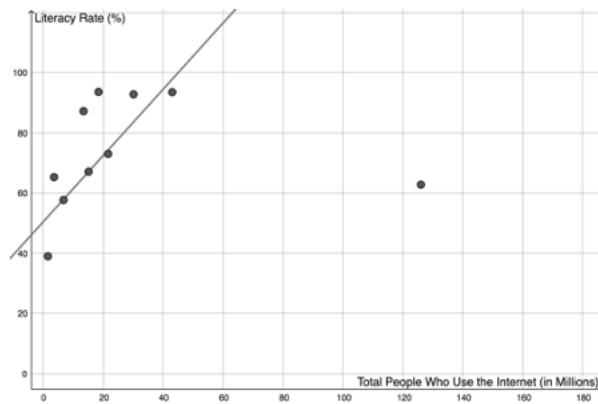

3. How does the slope of the line of fit relate to the associations from question 2?
4. Interpret the meaning of the slope in context.
5. Explain whether the y -intercept of the line makes sense in this context.

The scatter plot shows the relationship between the total number of people who use the internet in a region, in millions, and that same region's percentage of literacy rate.

6. The point (1.51, 39) is on the scatter plot. Interpret the meaning of this point in context.
7. Describe the association between the total number of people using the internet in a region and that region's literacy rate.

Suppose the line shown is fit to the data. The equation of the line of fit is $y = 1.1x + 50.5$.

8. How does the slope of the line of fit relate to the associations from question 7?
9. Interpret the meaning of the slope in context.
10. Explain whether the y -intercept of the line makes sense in this context.
