

Grade 8
Unit 13
Lesson 1 Practice

Name _____
Date _____
Period _____

In questions 1-3, identify whether the angle relationship is complementary, supplementary, or vertical. Then identify whether each pair of angles given are adjacent or not adjacent angles.

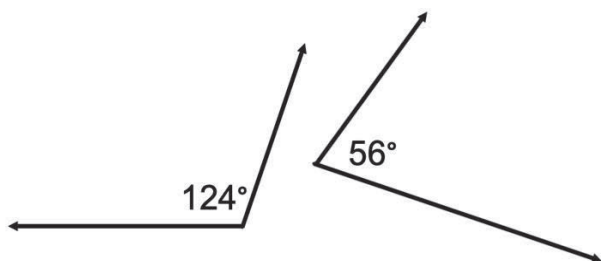

1. The angles are _____ and

- ☐ adjacent.
- ☐ not adjacent.

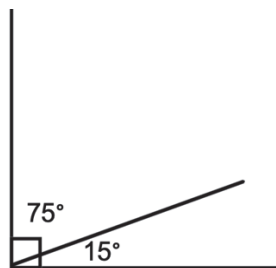

2. The angles are _____ and

- ☐ adjacent.
- ☐ not adjacent.

3. The angles are _____ and

- ☐ adjacent.
- ☐ not adjacent.

4. Two angles are supplementary angles if their measures add up to

- ☐ 90° .
- ☐ 180° .
- ☐ 360° .

5. Draw a pair of adjacent supplementary angles.

6. Supplementary angles that are adjacent form a(n)

- straight angle.
- acute angle.
- obtuse angle.
- right angle.

7. Two angles are complementary angles if their measures add up to

- 90° .
- 180° .
- 360° .

8. Draw a pair of non-adjacent complementary angles.

9. Vertical angles

- have equal measures.
- add up to 90° .
- add up to 90° .

10. Draw a pair of vertical angles.
