

Grade 8
Unit 13
Lesson 1 Practice

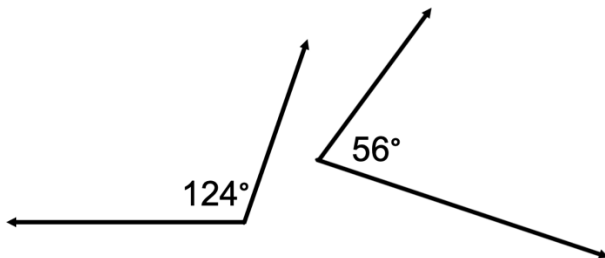

Name Answer Key
Date _____
Period _____

In questions 1-3, identify whether the angle relationship is complementary, supplementary, or vertical. Then identify whether each pair of angles given are adjacent or not adjacent angles.

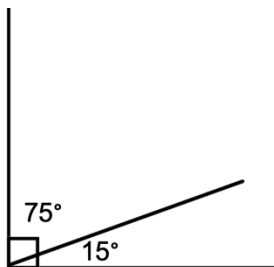

1. The angles are vertical and
- ☐ adjacent.
☒ not adjacent.

2. The angles are supplementary and
- ☐ adjacent.
☒ not adjacent.

3. The angles are complementary and
- ☒ adjacent.
☐ not adjacent.

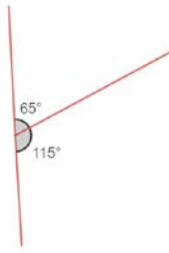

4. Two angles are supplementary angles if their measures add up to

☐ 90° .
☒ 180° .
☐ 360° .

5. Draw a pair of adjacent supplementary angles.

Answers may vary.

6. Supplementary angles that are adjacent form a(n)

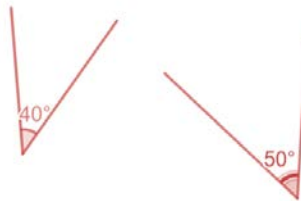

- ☒ straight angle.
- ☐ acute angle.
- ☐ obtuse angle.
- ☐ right angle.

7. Two angles are complementary angles if their measures add up to

- ☒ 90°.
- ☐ 180°.
- ☐ 360°.

8. Draw a pair of non-adjacent complementary angles.

Answers may vary.

9. Vertical angles

- ☒ have equal measures.
- ☐ add up to 90°.
- ☐ add up to 90°.

10. Draw a pair of vertical angles.

Answers may vary.
