

Grade 8
Unit 13
Lesson 3 Practice

Name _____
Date _____
Period _____

1. The Triangle Sum Theorem states that the ☐ sum
☐ difference of the measures of the ☐ exterior
☐ interior
☐ adjacent angles of a triangle is 180° .

2. Find the measure of Angle HIG .

Use Triangle BAG for questions 3–5.

3. Write an equation that can be used to find the value of y .

4. Solve the equation.

5. Find the measures of all the angles of Triangle BAG .

$\angle BAG =$ _____

$\angle AGB =$ _____

$\angle GBA =$ _____

6. Which statement is *not true* about the triangle?

- A. $\angle 1 + \angle 2 = \angle 4$
- B. $\angle 1 + \angle 2 + \angle 3 = 180^\circ$
- C. $\angle 1 + \angle 3 = 180^\circ$
- D. $\angle 3 + \angle 4 = 180^\circ$

7. Every interior angle of a triangle has 2 possible exterior angles. The exterior angles have the same measure since they are

- ☐ complementary.
- ☐ supplementary.
- ☐ vertical.

8. Consider the diagram shown. Find the value of x .

Use the figure shown for questions 9–10.

9. Write an equation to find the value of $\angle BCA$.

10. Solve the equation.
