

Grade 6 Accelerated
Unit 11
Lesson 5 Homework

Name _____
Date _____
Period _____

Use the table below to answer questions 1-3

The table shows transactions for 3 different checking accounts. A negative number represents a debit and a positive number represents a credit.

Account 1	Account 2	Account 3
\$225.90	\$318.25	\$253.30
-\$31.65	\$22.15	-\$112.25
\$98.70	-\$102.40	\$89.10
\$45.90	-\$19.70	-\$14.15

1. What is the ending balance of Account 1?
2. What is the ending balance of Account 2?
3. What is the ending balance of Account 3?

Use the information below to answer questions 4-5.

Foster recently went on a weekend hiking trip and recorded the elevation changes at several checkpoints. Foster's elevation log can be seen in the table below.

Checkpoint	Beginning Elevation (ft)	Final Elevation (ft)
1	-125.4	-78
2	-78	-101.6
3	-101.6	14.7
4	14.7	225.1

4. Which checkpoint at the greatest change in elevation?
5. If the next checkpoint has a change a final elevation of 148.3, what is the change in elevation?

6. Stanley's office has a parking garage that charges \$12.75 each day for parking. Stanley's employer provides him with a parking card that has \$250 each month. When Stanley parked today, the card indicated it had \$84.25 left on the card. How many days has Stanley used the card for parking this month?
7. Tanner is traveling on his first flight to visit family. $9\frac{3}{5}$ minutes into the flight, the pilot announces the plane is currently at an altitude of 6.15 miles. What was the rate, in minutes, the plane reached to this cruising altitude?
8. A penguin sitting on an iceberg notices a fish swimming below. The fish is 15.6 ft below sea level. The penguin dives and reaches the fish in $\frac{5}{8}$ of a minute. What was the rate of descent the penguin made?
9. The temperature in Alaska today was -58.8°C . Over the next 4 weeks, the temperature will increase an average of 3.6°C each week. What will the temperature be at the end of the 4 weeks?
10. Phoebe buys her dogs a bag of food that is 80.6 ounces. Each of Phoebe's dogs eat $\frac{7}{16}$ ounces a day. If she has 3 dogs, how long will the bag of dog food last Phoebe?
