

1. What is the common denominator of $4\frac{1}{7}$ and $2\frac{3}{8}$?

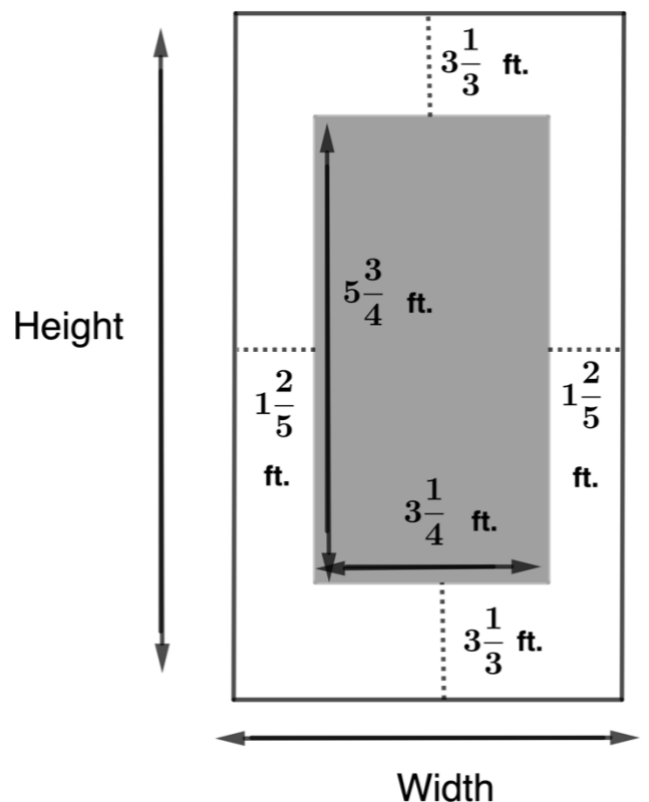

Use the given context and image to answer questions 2-7.

Sawyer's mom gifted her with a framed quilt for her birthday. The dimensions are shown in the image, in feet (ft).

2. What is the perimeter of the quilt, in ft?
3. Write an expression that represents the width of the frame and quilt.

4. What is the total width, in ft?

5. Write an expression that represents the height of the frame and quilt.

6. What is the total height, in ft?

7. What is the total perimeter of the framed quilt, in ft?

For questions 8-10, rewrite the expression as an expression with common denominators. Then, add or subtract the values.

8. $6\frac{1}{8} - 2\frac{3}{5} =$

9. $4\frac{1}{4} + 6\frac{7}{10} =$

10. $2\frac{1}{9} - \frac{4}{7} =$
