

Use the given context to answer questions 1-4.

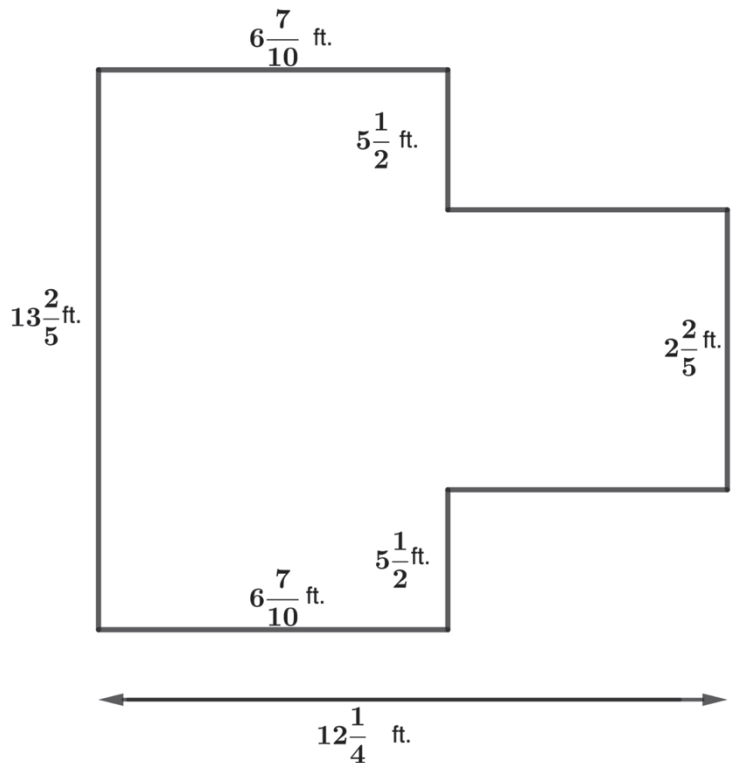

Lorie is building a unique garden in her backyard. The diagram shows the design and measurements of her garden, in feet (ft), which are not drawn to scale.

1. Lorie wants to build a fence around the outside of her garden to keep her dogs out. Does this context represent perimeter or area?

2. How many feet of fencing will Lorie need to build the fence around the outside of her garden?

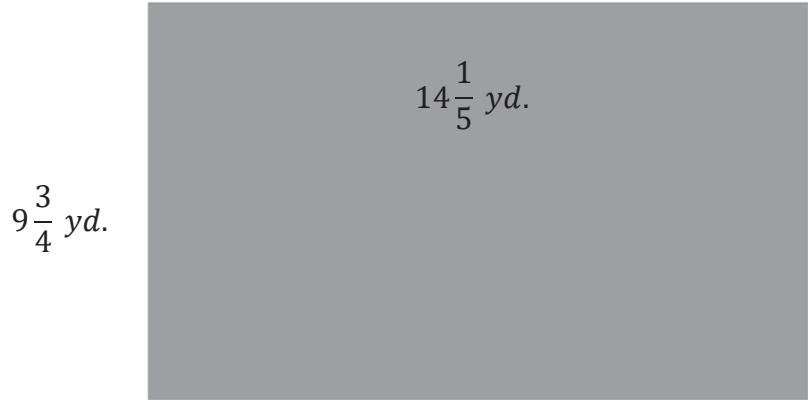

3. Lorie wants to know how much room she has to plant vegetables and herbs in her garden. Does this context represent perimeter or area?

4. How large is the area that Lorie has to plant produce?

Use the given context to answer questions 5-7.

Mateo is building a house and wants to paint one wall with chalkboard paint. The wall he wants to paint is shown with measurements in yards (yd).

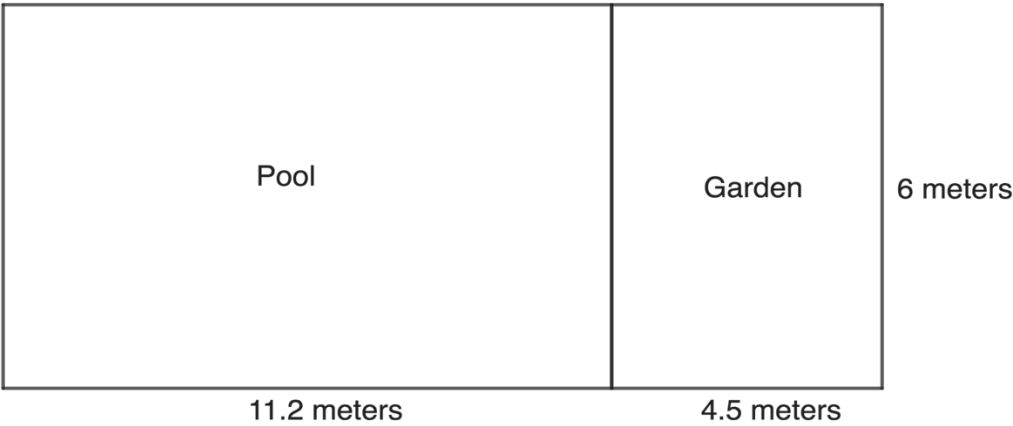

- 5. Does the given real-world situation represent perimeter or area?
- 6. What is the appropriate unit of measurement for the given real-world situation?
- 7. How much chalkboard paint will Mateo need to paint the wall?

Use the given context to answer questions 8-10.

Blakely recently built a house with a large backyard. A diagram of her backyard is shown.

- 8. What is the area of the pool enclosure?

- 9. Blakely wants to build a fence around her backyard. How much fencing will she need?
- 10. What is the area of the garden enclosure?
