

Grade 6
Unit 4
Lesson 8 Practice

Name _____
Date _____
Period _____

Complete each statement and model it on the number line.

1. $|9| = \underline{\hspace{2cm}}$

2. $|-3.5| = \underline{\hspace{2cm}}$

3. $|8.25| = \underline{\hspace{2cm}}$

4. $\left|\frac{7}{3}\right| = \underline{\hspace{2cm}}$

5. Martina claims that an absolute value cannot be negative. Explain whether you agree with Martina.

The rational numbers -1.4 and 1.4 are opposites.

6. Complete the two statements shown and model them on the number line.

$$|-1.4| = \underline{\hspace{2cm}}$$

$$|1.4| = \underline{\hspace{2cm}}$$

7. What is the relationship between the absolute values of -1.4 and 1.4 ?

Consider the incomplete statement $|\underline{\hspace{1cm}}| = 6\frac{1}{4}$

8. Explain why there are two rational numbers that could have an absolute value of $6\frac{1}{4}$.

9. Complete the statements with two different rational numbers and model them on the number line.

$$|\underline{\hspace{1cm}}| = 6\frac{1}{4}$$

$$|\underline{\hspace{1cm}}| = 6\frac{1}{4}$$

10. Complete the statements with two different rational numbers and model them on the number line.

$$|\underline{\hspace{1cm}}| = 2.9$$

$$|\underline{\hspace{1cm}}| = 2.9$$
