

Grade 6
Unit 5
Lesson 5 Practice

Name Answer Key
Date _____
Period _____

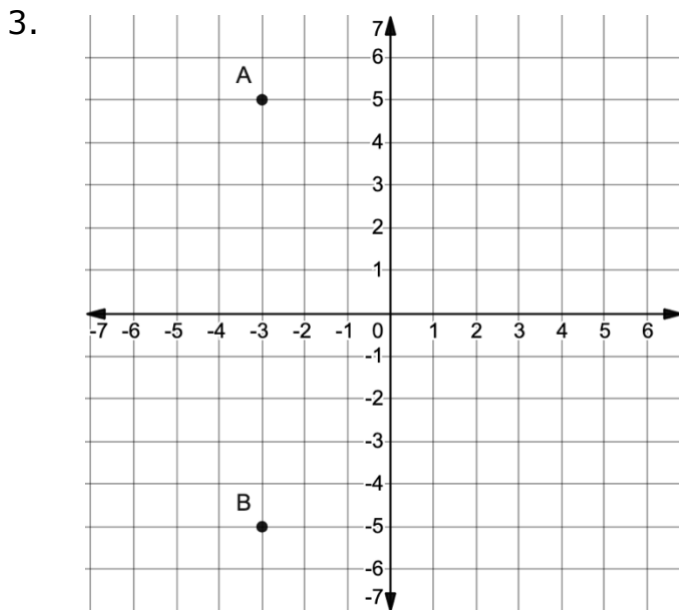

Determine the distance between each set of ordered pairs.

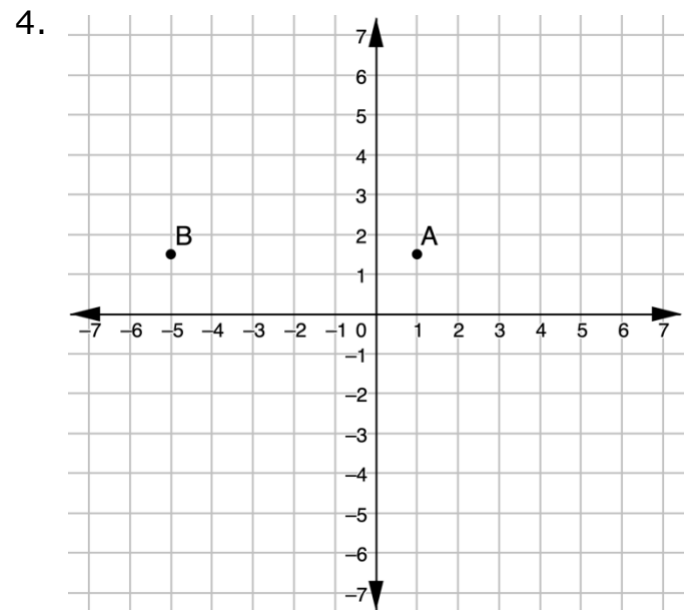

$$|0| + |-6| = 6 \text{ units}$$

$$|-3| + |4| = 7 \text{ units}$$

$$|5| + |-5| = 10 \text{ units}$$

$$|-5| + |1| = 6 \text{ units}$$

$$5. \quad \left(4\frac{1}{2}, \underline{12}\right) \text{ and } \left(4\frac{1}{2}, \underline{7\frac{1}{2}}\right)$$

$$|12| - \left|7\frac{1}{2}\right| = 4\frac{1}{2} \text{ units}$$

$$6. \quad (3, \underline{-2}) \text{ and } (3, \underline{0})$$

$$|0| + |-2| = 2 \text{ units}$$

$$7. \quad \left(\underline{7.5}, \frac{21}{2}\right) \text{ and } (\underline{-3}, 10.5)$$

$$\frac{21}{2} = 10.5$$

$$|7.5| + |-3| = 10.5 \text{ units}$$

$$8. \quad \left(\underline{6\frac{7}{8}}, 2\right) \text{ and } \left(\underline{-\frac{5}{8}}, 2\right)$$

$$\left|6\frac{7}{8}\right| + \left|-\frac{5}{8}\right| = 7\frac{4}{8} = 7\frac{1}{2} \text{ units}$$

$$9. \quad (\underline{6}, 16.5) \text{ and } (\underline{-2}, 16.5)$$

$$|6| + |-2| = 8 \text{ units}$$

$$10. \quad \left(\underline{-1.5}, -2\frac{1}{4}\right) \text{ and } \left(\underline{-8.5}, -2\frac{1}{4}\right)$$

$$|-8.5| - |-1.5| = 7 \text{ units}$$
