Name Answer Key
Date _____
Period _____

A table representing gasoline prices per gallon at one gas station is shown.

Gas (gallons)	Price (dollars)
$\frac{1}{2}$	\$1.56
10	\$31.20
3	\$9.36
17	\$53.04

Use the table for questions 1 through 5.

1. A truck that holds 24 gallons of gas will pay \$74.88.

1) $\frac{31.20}{10} = \frac{3.12}{1}$ 2) $\frac{74.88}{3.12}$

2. A push mower typically uses 2 gallons of gas, which will cost \$6.24 to fill up the tank.

$2(3.12)$

3. The road trip from Orlando, FL to St. Louis was 1008 miles. If the automobile got 24 miles per gallon on the trip, ☐ 42 gallons of gas was needed at a cost of ☐ \$131.04 .

☐ \$74.88

$\frac{1008}{24} = 42 \text{ gallons}$ $42(3.12)$

4. One unit, or gallon, of gas to its cost can be written as 1: \$3.12.

5. The gas station down the street has a unit rate of $\frac{1}{\$3.09}$. That station has an ☐ increased unit rate than the station represented by the table.

☐ decreased

Ice Treats has started selling their popular homemade ice cream by the pound. The advertised cost of 5 flavors of ice cream is represented in the table.

Strawberry	Chocolate	Vanilla	Mocha Latte Swirl	Mint Chocolate
$\begin{array}{r} 3: \$4.50 \\ \underline{4.50} \\ 3 \end{array}$	$\begin{array}{r} 2 \\ \underline{\$2.50} \\ 2.50 \\ \underline{2} \end{array}$	$\begin{array}{r} 1.5: \$1.50 \\ \underline{1.50} \\ 1.5 \end{array}$	$\begin{array}{r} 4 \text{ to } \$7.20 \\ \underline{7.20} \\ 4 \end{array}$	$\begin{array}{r} .5 \\ \underline{\$.75} \\ .75 \\ \underline{.5} \end{array}$

6. What is the unit rate for each flavor of ice cream?

- strawberry \$1.50/1 lb.
- chocolate \$1.25/1 lb.
- vanilla \$1/1 lb.
- mocha latte swirl \$1.80/1 lb.
- mint chocolate \$1.50/1 lb.

7. The flavor ☐ strawberry ☒ mocha latte swirl has the greatest price per pound.

8. After a busy weekend at Ice Treats, Jessy had sold \$18 of vanilla ice cream. Jessy sold 18 pounds that weekend.

9. Rylan wants to buy 5 pounds of chocolate ice cream for his family party. He will pay a total of \$6.25 for 5 pounds of chocolate ice cream.

$$5(1.25) = 6.25$$

10. Miles went to Ice Treats with \$5.50. How many pounds of mocha latte swirl can he take home?

$$\frac{\$5.50}{1.80} = 3.0\bar{5}$$

3 lbs.
