

For each number line model, write the addition expression represented and find the sum.

1.

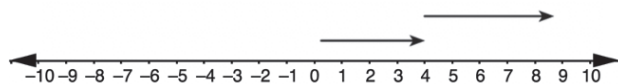

Addition Expression	Sum

2.

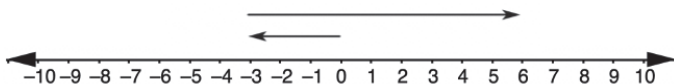

Addition Expression	Sum

3.

Addition Expression	Sum

4.

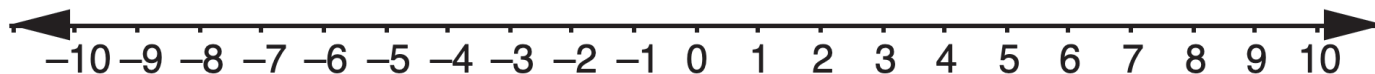

Addition Expression	Sum

5. Use the number line to show the sum of $-1 + 5$. Then, complete the equation.

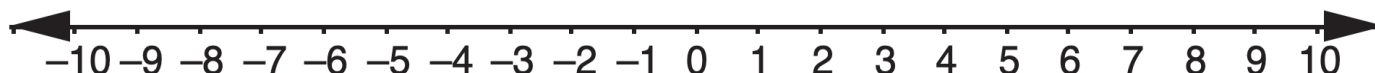

$$-1 + 5 = \underline{\hspace{2cm}}$$

6. Use the number line to show the sum of $-2 + (-6)$. Then, complete the equation.

$$-2 + (-6) = \underline{\hspace{2cm}}$$

7. Use the number line to show the sum of $-9 + 3$. Then, complete the equation.

$$-9 + 3 = \underline{\hspace{2cm}}$$

In a single day, the temperature in degrees Fahrenheit ($^{\circ}\text{F}$) of a town in Canada began at a low of -60°F and increased 20°F by noon.

8. Plot a point at the low temperature.

9. Draw a ray along the number line to represent the increase of 20°F .

10. What was the temperature in the town by noon?
