

Unit 7, Lesson 6: More Integer Addition

Benchmark

MA.6.NSO.4.1 Apply and extend previous understandings of operations with whole numbers to add and subtract integers with procedural fluency.

Learning Target

- ☐ I can add integers with procedural fluency.

7.6.1 Warm-Up: True Equations

1. Using integers between -3 and 3 one time each, fill in the blanks to make the equation true.

$$\boxed{} + \boxed{} = \boxed{}$$

7.6.2 Activity: Integer War

Set Up:

- Remove all jokers and face cards (Kings, Queens, and Jacks) from the deck.
- With your partner, determine who is the dealer. The dealer deals the entire deck of cards to each player, face down.

Rules:

- The black cards (Spades  and Clubs ) represent positive values.
- The red cards (Diamonds  and Hearts ) represent negative values.
- Aces represent either 1 or -1 , while the other cards represent the positive or negative value indicated on the card.

How to Play:

- To begin, each player will flip over one card from their deck and place it in the center.
- The first player to figure out the sum of the two integers keeps both cards and adds them to the bottom of their stack.
 - NOTE: If a player says an incorrect sum, the other player responds for a chance to win the hand before the first player can change their answer.
- Repeat this process until time is called or until all of the cards have been used.

7.6.3 Guided Practice: Fluency with Adding Integers

1. Find each sum.

a. $-73 + 210$

b. $143 + (-9)$

c. $-18 + 875$

d. $-175 + (-544)$

e. $92 + (-100)$

f. $-256 + (-301)$

2. Write two tips to share with someone who is just learning how to add integers.

7.6.4 Your Turn!

1. Find each sum.

a. $10 + (-204)$

b. $(-99) + (99)$

c. $904 + (-11)$

d. $-1 + 76$

e. $205 + (-643)$

f. $-151 + (-70)$

g. $-399 + (-405)$

h. $-80 + 606$

i. $703 + (-190)$

j. $-600 + (-78)$

7.6.5 Wrap-Up: Ticket Out the Door

1. Find each sum.

a. $808 + (-547)$

b. $-322 + (-65)$

c. $-755 + 707$
