

Grade 6
Unit 8
Lesson 10 Practice

Name _____
Date _____
Period _____

A pizza box measures 12 inches (in.) long, 12 in. wide, and 2.25 in. tall.

1. Sketch the net of the pizza box.

2. Label the dimensions of each face on the net.

3. Find the area of each face. Include units.

1. $12 \times 12 = 144 \text{ in.}^2$

4. $12 \times 2.25 = 27 \text{ in.}^2$

2. $12 \times 12 = 144 \text{ in.}^2$

5. $12 \times 2.25 = 27 \text{ in.}^2$

3. $12 \times 2.25 = 27 \text{ in.}^2$

6. $12 \times 2.25 = 27 \text{ in.}^2$

4. Add the area of the faces to find the surface area of the cereal box. Include units.
 $144 + 144 + 27 + 27 + 27 + 27 = 396 \text{ in.}^2$

Sharee is painting storage boxes. The box has measurements 12 inches (in.) long, 12 in. wide, and 12 in. high.

5. Sketch and label the net of the storage box.

All sides are 12 in.

6. What is the surface area of the storage box? Include units.

1. $12 \times 12 = 144 \text{ in.}^2$

2. $12 \times 12 = 144 \text{ in.}^2$

3. $12 \times 12 = 144 \text{ in.}^2$

4. $12 \times 12 = 144 \text{ in.}^2$

5. $12 \times 12 = 144 \text{ in.}^2$

6. $12 \times 12 = 144 \text{ in.}^2$

$144 + 144 + 144 + 144 + 144 + 144 = 864 \text{ in.}^2$

Tyrone is applying stain to a toy chest he made for his sister. The toy box is 33 inches (in.) long, 18 in. wide, and 15 in. tall. The net of the box is shown.

- 7. Label the side lengths of the net.
- 8. Determine the area of each face and record the dimensions in the table.

Face	Area (in ²)
A	$33 \times 15 = 495 \text{ in.}^2$
B	$33 \times 18 = 594 \text{ in.}^2$
C	$33 \times 15 = 495 \text{ in.}^2$
D	$33 \times 18 = 594 \text{ in.}^2$
E	$18 \times 15 = 270 \text{ in.}^2$
F	$18 \times 15 = 270 \text{ in.}^2$

- 9. What is the surface area of the box that Tyrone needs to buy stain for? Include units.

$$495 + 594 + 495 + 594 + 270 + 270 = 2,718 \text{ in.}^2$$

- 10. Geri is wrapping a small gift box for a friend’s birthday. The box is 2.75 inches (in.) long, 1.75 in. wide, and 1 in. high. What is the surface area of the box that Geri will need to buy wrapping paper for? Include units.

$$\begin{aligned}
 &1. \quad 2.75 \times 1.75 = 4.8125 \text{ in.}^2 \\
 &2. \quad 2.75 \times 1.75 = 4.8125 \text{ in.}^2 \\
 &3. \quad 2.75 \times 1 = 2.75 \text{ in.}^2 \\
 &4. \quad 2.75 \times 1 = 2.75 \text{ in.}^2 \\
 &5. \quad 1.75 \times 1 = 1.75 \text{ in.}^2 \\
 &6. \quad 1.75 \times 1 = 1.75 \text{ in.}^2 \\
 &\qquad 4.8125 + 4.8125 + 2.75 + 2.75 + 1.75 + 1.75 \\
 &\qquad = 18.625 \text{ in.}^2
 \end{aligned}$$
