

Three statistical questions are shown in the table. For each question, identify the type of data each question would produce, and a method that can be used to collect truthful data.

	Statistical Question	Type of Data	Method to Collect Truthful Data
1.	How many pets does a typical sixth grader have?	☐ categorical ☐ quantitative	
2.	What is the most popular style of music?	☐ categorical ☐ quantitative	
3.	How long does it take to get to school in the morning?	☐ categorical ☐ quantitative	

Mila collected data from students in her class to answer the question: “How many hours per week do you spend on homework?” Her data are shown.

2	3.5	3	8	1.5	5	4.5	3	2.5	10
6.5	7.5	2	8	6	7.5	2.5	4.5	3	3.5

4. Determine the five-number summary for Mila’s data.

5. Create a box plot to display Mila’s data.

6. Create a frequency chart of the data.

Hours	Frequency

7. Create a histogram of the data.

8. What is the mean of Mila's data?

9. What is the median of Mila's data?

10. Summarize Mila's results using statistical terminology.
