

Orion collected data from students in his class to answer the question: "How many minutes does it take my classmates to run *one* mile?" His data are shown.

8.5	7	9.5	11.5	8	10	9.5	11	12.5	15
11	11.5	10	6.5	13	12.5	10.5	13.5	15	16.5

1. Determine the five-number summary for Orion's data.

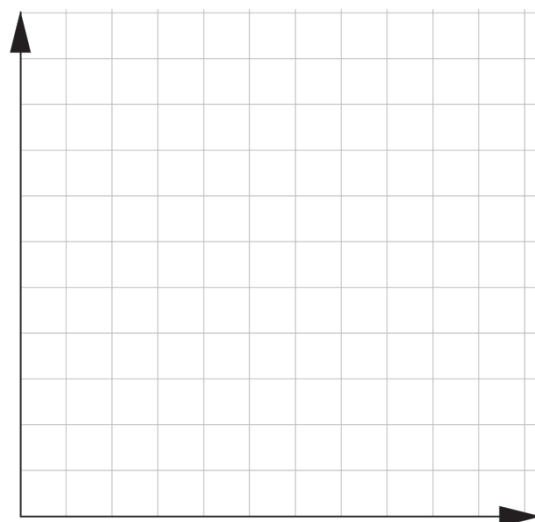

2. Create a box plot to display Orion's data.

3. Create a frequency chart of the data.

Time (min.)	Frequency

4. Create a histogram of the data.

5. What is the mean of Orion's data?

6. What is the median of Orion's data?
7. Describe the distribution's shape, center, spread, and unusual features.
8. Summarize Orion's results using statistical terminology.
9. Explain which type of graph, box plot or histogram, is better for displaying Orion's data.
10. What could Orion have done to gather truthful data to answer his statistical question?
