

The histogram shows the daily number of coffees sold in a cafe.

1. Describe the shape of the histogram.
2. Explain which measure of center, mean or median, best represents this data.
3. Explain which measure of variability, range or IQR, best represents this data.

The numbers of weekly miles run by a marathon runner in training are shown.

15, 15, 15, 16, 17, 17, 17, 18, 18, 19, 20, 21

4. Explain which measure of center, mean or median, best represents this data.
5. Explain which measure of variability, range or IQR, best represents this data.

The histogram shows the number of hours of sleep a person got over the past *two* weeks.

6. Describe the shape of the histogram.
7. Explain which measure of center, mean or median, best represents this data.
8. Explain which measure of variability, range or IQR, best represents this data.

The ages of the people at a party are shown.

5, 5, 5, 5, 5, 5, 6, 6, 6, 6, 6, 18, 35

9. Explain which measure of center, mean or median, best represents this data.
10. Explain which measure of variability, range or IQR, best represents this data.
