

Write an algebraic expression to represent each real-world situation.

1. Julia has 11 videogames downloaded to her device. She deleted x of those games from the device. How many videogames are left on her device?
2. Tony has x tickets from a local arcade. His brother has 10 times more tickets than Tony. How many tickets does his brother have?
3. Susan sold 42 candy bars for a fundraiser. Her friend sold x more candy bars than her. How many candy bars did the friend sell?
4. A grocery store has received a shipment of 60 new boxes of cereal to be placed equally on x shelves. How many boxes will be on each shelf?
5. Harold has a plant that measured h inches tall last week. This week, the plant is 19 inches tall.

For each expression, create a real-world scenario that the algebraic expression could represent.

6. $x + 7$

7. $\frac{22}{x}$

8. $71y$

9. $k - 81$

10. $12 + h$
