

1. What is the inverse of subtraction?

addition

2. What is the inverse of addition?

subtraction

For questions 3-7, use the algebra tiles shown.

3. What expression represents the left side of the equation?

$y + 4$

4. What expression represents the right side of the equation?

7

5. Write the algebraic representation of the equation.

$$y + 4 = 7$$

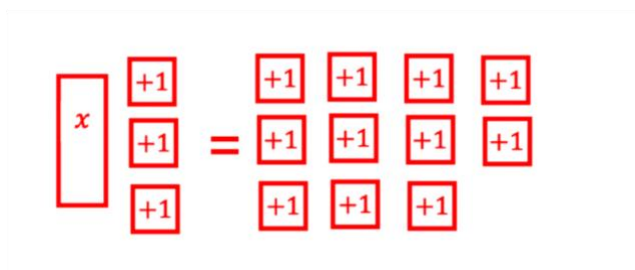

6. What operation would be used to solve the equation?

subtraction

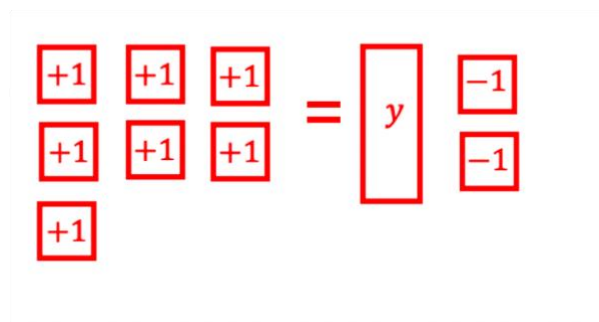

7. What value of y makes the equation true?

$$y = 3$$

8. Represent the equation $x + 3 = 11$ by drawing a model using Algebra Tiles.

9. Represent the equation $7 = y - 2$ by drawing a model using Algebra Tiles.

10. Represent the equation $6 = 5 + g$ by drawing a model using Algebra Tiles.
