

Name: _____

Period: _____ Date: _____

7th Grade

Lesson 2.9 Skills Practice Worksheet

Directions: Read each situation and determine the probability.

1. Jaliyah plays soccer and makes a goal $\frac{2}{3}$ times when practicing without a goalie.
 - a. Determine the sample space
 - b. Find each probability:
 - i. P(goal): _____
 - ii. P(miss): _____
 - c. Jaliyah made 30 shots. How many goals can we predict she made based on the theoretical probability?
2. Shawn 12 legos in a bag (5 blue, 3 green, 2 white, 2 gray). He does a simulation by pulling a lego out of the bag, recording the color and then replaces it back in the bag. If he did this 100 times, what is the experimental probability of each color?
 - a. P(blue): _____
 - b. P(green): _____
 - c. P(white): _____
 - d. P(gray): _____
3. Alycia randomly picks cards numbered 2-21.
 - a. Determine the sample space.
 - b. Find the theoretical probability.
 - i. P(even): _____
 - ii. P(multiple of 3): _____
 - iii. P(22): _____
