

6Ath Grade: Unit 14, Lesson 9

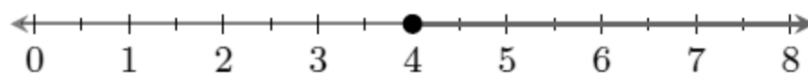

1. What inequality is represented by the graph below?

2. What is the maximum value for x in the inequality $x \leq 19$?
3. What is a possible value that is in the solution set for the inequality $y < 4$?

4. What step do you have to take to solve the inequality $x + 2.3 \leq 5.5$?

5. What is the inequality represented by the following graph?

6. Describe the graph for the inequality $x > 1$ on the number line.
