

Grade 6 Accelerated
Unit 12
Lesson 5 Homework

Name Answer Key
Date _____
Period _____

For each problem, round your answer to the nearest hundredth, if necessary.

1. The original price of a wooden table is \$34. With a discount of the 25%, what is the sale price?

$$34(0.75) = \$25.50$$

2. Gary buys a pair of jeans online for \$78. The shipping company charges 8% of the item price to make the delivery, how much do the jeans and shipping cost to Gary?

$$78(1.08) = \$84.24$$

3. A customer pays \$435.89 for an Xbox Game console and a game. The customer also needs to pay 5% for taxes with his purchase. What is the total price the customer needs to pay at checkout?

$$435.89(1.05) \approx \$457.68$$

4. The sales tax rate is 4%. If Gus buys a new pair of shoes priced at \$117.93, what will be the cost including tax?

$$117.93(1.04) \approx \$122.65$$

5. A furniture company sold a sofa for \$765 and with sales tax, the sofa came out to \$815.36. What is the sales tax percentage?

$$\begin{aligned} 815.36 - 765 &= 50.36 \text{ sales tax} \\ \frac{50.36}{765} \times 100 &= 6.58\% \end{aligned}$$

6. A computer monitor cost a company \$364 and is now selling it for \$476. What is the markup percentage?

$$476 - 364 = 112 \text{ mark up}$$
$$\frac{112}{364} \times 100 = 30.77\%$$

7. Riley bought a game that cost \$45.25. After sales tax, the total is \$47.99. What is the sales tax percentage?

$$47.99 - 45.25 = 2.74 \text{ sales tax}$$
$$\frac{2.74}{45.25} \times 100 = 6.06\%$$

8. A bill for a restaurant came out to be \$137.50. The customer tips 15% of the bill. How much does the customer leave for the tip?

$$137.50(0.15) \approx \$20.63$$

9. George and his friend are celebrating each other's birthday. They decided to go to Top Golf. After appetizers and an hour of playing golf, the total bill, including the tip was \$186.55. The friends left a 20% tip. How much was the bill, excluding the tip?

$$\begin{array}{rcl} \% & 1.2 & 1 \\ \$ & \frac{186.55}{1.2} & = \frac{1}{x} \\ & 1.2x = 186.55 & \\ & x = \$155.46 & \end{array}$$

10. Some friends went to a convenience store to buy snacks to watch a home baseball game. The cost of snacks was \$87.62 and also 3% for taxes. How much was the total price of the bill?

$$87.62(1.03) \approx \$90.25$$
