

6Ath Grade: Unit 12, Lesson 6

1. After a nice meal, the bottom of a bill says: subtotal \$52.35, sales tax \$2.93, and a tip of \$10.47. What is the total bill?

2. If the subtotal of the bill is \$42.35, and the sales tax of the bill is 7.8%, what is the total bill if there is no tip?

3. The formula for sales tax rate is shown below. If the price of a product is \$8.94 and the sales tax of the product is \$2.24, what is the sales tax rate?

$$\frac{\text{Sales Tax}}{\text{Price}} = \text{Sales Tax Rate}$$
