

Grade 7 Accelerated
Unit 1
Lesson 6 Homework

Name _____
Date _____
Period _____

A local town is working to repair its historic water tower. The water tower began with 110,000 gallons of water and was drained out at a rate of 2,150 gallons per hour. How long has the water tower been draining if there are currently 79,900 gallons of water in the tower?

1. What are the known quantities?

2. What is the unknown quantity?

3. Write an equation that could be used to find the unknown quantity using the variable you defined.

4. Solve the equation.

5. Explain what the solution means in this context.

A baby giraffe grows at a rate of 0.08 feet, ft., every day during their first week alive. A giraffe was recently born at a local zoo at a birth height of 6ft. How many days old is the giraffe if its recent height is 6.48 ft?

6. What are the known quantities?
7. What is the unknown quantity?
8. Write an equation that could be used to find the unknown quantity using the variable you defined.
9. Solve the equation.
10. Explain what the solution means in this context.
