Unit 1
Lesson 7 Homework

Name _____
Date _____
Period _____

Georgina was given a \$50 gift card to a music downloading app. She purchased 18 songs from the app that all cost the same amount each. If she has \$18.50 remaining on her gift card, how much did each song cost?

1. Define the variable.
2. Write an equation that can be used to answer the question.
3. Solve the equation.
4. Explain the meaning of the solution.
5. Does the solution make sense for the problem? Why or why not?

Ethan is baking a batch of cupcakes for his son's birthday party. Each batch of cupcakes requires $1\frac{1}{3}$ cups of sugar. He has 15 cups of sugar, but his wife asked him to save her $\frac{2}{3}$ cup of sugar for something she needs to bake. How many batches of cupcakes can Ethan make?

6. Define the variable.
7. Write an equation that can be used to answer the question.
8. Solve the equation.
9. Explain the meaning of the solution.
10. Does the solution make sense for the problem? Why or why not?
